ANNUAL SALARIES OF HOSPITAL NURSING PERSONNEL

TRAITEMENTS ANNUELS DU PERSONNEL INFIRMIER DES HÔPITAUX

1972

NOTE

Former Catalogue 83-218 "Annual Salaries of Hospital Nursing Personnel" was not published in 1971. As established salary range data are based on salary contracts which are negotiated on a two-year basis this report will now be published biennially.

NOTA

La publication "Traitements annuels du personnel infirmier des hôpitaux" (catalogue 83-218) n'a pas paru en 1971. Vu que les données concernant les échelles de traitement sont fondées sur des accords négociés pour deux ans, le présent bulletin ne paraîtra désormais qu'une fois tous les deux ans.

Statistics Canada should be credited when republishing all or any part of this document Reproduction autorisée sous réserve d'indication de la source: Statistique Canada

Statistics Canada in 1967 initiated the collection of statistics on salaries paid to full-time graduate nurses employed in Canadian public general and allied special hospitals. to meet the increasing demands for this information from both government and private sectors of the economy. In 1968, the scope of the Nurses Salary Survey was expanded (by type of hospital) to cover mental institutions and tuberculosis sanatoria and (by type of employment) also to include full-time nursing assistants. The publication of this report provides a comprehensive account of the variations in salaries among hospital nursing staff by a cross-classification of employment categories and levels of academic qualifications.

Statistics Canada is indebted to the individual hospitals across the nation which have prepared their data for inclusion in a national statistical program; to the Canadian Nurses' Association for their assistance and advice; to the provincial hospital associations and the Canadian Hospital Association for their co-operation and support.

The report was prepared in the Health Manpower Section of the Health and Welfare Division of Statistics Canada.

En réponse à la demande croissante de renseignements, de la part des secteurs publics et privés de l'économie, Statistique Canada a recueilli pour la première fois en 1967 des statistiques sur la rémunération des infirmières diplômées travaillant à plein temps dans les hôpitaux publics généraux et spéciaux divers du Canada. En 1968, le champ d'observation de l'enquête à été élargi de facon à englober, dans les genres d'hôpitaux, les établissements pour malades mentaux et les sanatoriums pour tuberculeux et. dans les catégories d'emplois, les infirmières auxiliaires à plein temps. Les tableaux à entrée multiple sur les catégories d'emploi et les niveaux de formation professionnelle compris dans le présent rapport donnent un exposé complet des variations de traitement du personnel infirmier des hôpitaux.

Statistique Canada tient à remercier les hôpitaux du Canada pour les renseignements qu'ils ont bien voulu fournir dans le cadre d'un programme statistique d'envergure nationale, l'Association des infirmières canadiennes pour son aide et ses conseils, les associations provinciales d'hôpitaux et l'Association des hôpitaux du Canada, pour leur concours et leur soutien.

Le rapport a été rédigé à la Section de la main-d'oeuvre sanitaire, Division de la santé et du bien-être, Statistique Canada.

SYLVIA OSTRY, Chief Statistician of Canada.

EXPLANATORY NOTES AND GLOSSARY

Scope

Included in the survey were full-time lay nurses employed in all public general, allied special, mental and tuberculosis hospitals in operation in 1972. Table 1 gives a summary for all categories of nursing employment while Tables 2 to 11 are designed to bring out the variations by type and size of hospital as well as province, in salaries for the "graduate nurse only", group which represents the overwhelming majority of nurses involved in this survey.

Hospital

An institution which is operated for the medical, surgical and/or obstetrical care of in-patients, and which is licensed or approved as a hospital by the federal and/or a provincial government, or by a municipality duly authorized under the laws of the province. Specifically excluded are institutions primarily for tuberculosis, or psychiatric disorders.

Public Hospital

Recognized by the province as a "public hospital" which is not operated for profit and accepts all patients regardless of ability to pay.

Type of Service

General

A hospital which provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries. The services of a general hospital are not restricted to a specific age group or sex.

With long-term units — Refers to a hospital with a group of beds or rooms or a separate wing or building which is recognized as a distinct and separate treatment unit of the hospital. Admission normally requires formal admission procedures even when transferred from another part of the hospital.

Full-teaching hospital — Applies to a hospital which provides medical education programs, approved by the appropriate authorities, for the major (not only elective) clinical instruction in at least the medical disciplines of internal medicine and general surgery to undergraduate medical students in their final two years.

Partial-teaching hospital — Applies to a hospital which provides post-graduate medical education programs, approved by the appropriate authorities, in at least one residency program in a medical specialty.

Allied Special Hospitals

Includes children's, convalescent and/or rehabilitation, chronic and/or extended care and "other" hospitals.

Children's — A hospital which provides primarily for the diagnosis and short-term treatment of paediatric patients, generally 14 years of age and under.

Convalescent and/or rehabilitation — A hospital whose program is directed primarily to the recovery and rehabilitative phase of treatment for patients disabled by illness or injury.

Chronic and/or extended care — \boldsymbol{A} hospital which provides primarily for the prolonged treatment of

NOTES EXPLICATIVES ET TERMINOLOGIE

Portée

L'enquête visait les infirmières laïques à plein temps employées dans l'ensemble des hôpitaux publics généraux, spécialisés, psychiatriques et antituberculeux en activité en 1972. Le Tableau l présente un résumé de toutes les catégories d'emploi du personnel infirmier, tandis que les Tableaux 2 à ll visent à faire ressortir les variations, selon le genre et la taille de l'hôpital, ainsi que par province, de la rémunération des "infirmières diplômées seulement", groupe réunissant la grande majorité des infirmières qui font l'objet de cette enquête.

Hôpital

Établissement donnant des soins médicaux, chirurgicaux ou obstétriques aux hospitalisés et détenant un permis ou une approbation du gouvernement fédéral ou provincial ou d'une municipalité autorisée à le faire par les lois d'une province. Ne comprend pas les établissements destinés avant tout au traitement de la tuberculose ou des troubles psychiatriques.

Hôpital public

Hôpital reconnu comme tel par la province et établi dans un but non lucratif; il accepte tous les malades sans égard à leur capacité de payer.

Genre de service

Hôpital général

Hôpital qui se spécialise dans le diagnostic et le traitement à court terme d'un grand nombre de maladies et de traumatismes. Les services d'un hôpital général ne sont pas restreints à un groupe d'âge ou à un sexe particulier.

Services de soins à long terme — Services d'un hôpital comprenant un groupe de lits ou de chambres ou une aile ou un bâtiment séparé qui est considéré comme quartier de traitement distinct. Pour y être admis, il faut en général remplir les formalités de demande d'admission, même s'il s'agit d'un transfert d'un autre quartier de l'hôpital.

Hôpital d'enseignement complet — Désigne un hôpital qui offre des programmes d'enseignement médical, dûment approuvés par les autorités compétentes, pour la formation clinique des étudiants effectuant leurs deux dernières années d'études dans les disciplines majeures (non pas seulement facultatives), dont la médecine interne et la chirurgie générale.

Hôpital d'enseignement partiel — Désigne un hôpital qui offre des programmes réguliers d'enseignement médical, dûment approuvés par les autorités compétentes, aux diplômés en médecine dans au moins un programme de résidence d'une spécialité médicale.

Hôpitaux spéciaux divers

Comprend pédiatrique, convalescence et (ou) réadaptation, chronique et (ou) soins prolongés et "autres" hôpitaux.

Pédiatrique — Hôpital qui se spécialise dans le diagnostic et le traitement à court terme des maladies chez les enfants, âgés généralement de 14 ans ou moins.

Convalescence et (ou) réadaptation — Hôpital qui s'occupe surtout du rétablissement et de la réadaptation des personnes rendues invalides par suite d'un maladie ou d'une traumatisme.

Maladies chroniques et (ou) soins prolongés — Hôpital qui se spécialise dans le traitement des malades souffrant de

patients with chronic and long-term conditions.

Other — A hospital which provides primarily for the treatment of a limited range of diseases or injuries, or which restricts admissions to a particular age group or sex. Examples of such specified categories may include orthopaedic, maternity, neurological, cancer hospitals. A hospital which provides a combination of various types of service and cannot be classified in any one of the foregoing categories is included in this group. "Other" also includes Nursing Stations and Outpost Hospitals.

Type of Unit

Short-term

Those units provided for patients who at the time of admission require extensive diagnostic and treatment services and/or skilled nursing care and comprehensive medical attention.

Long-term

Convalescent and/or rehabilitation — refers to units providing for the care and treatment of patients:

- (a) who have passed the acute or emergency stage and whose condition can be improved by skilled nursing care and medical attention in a hospital and/or
- (b) who have disabling conditions which may be improved by rehabilitation treatment in hospital.

Chronic and/or extended care — refers to units providing for the care and treatment of patients suffering from chronic or long-term illnesses or conditions which require continued nursing care and medical attention in a hospital.

Other - refers to long-term units which do not clearly fall under the foregoing categories.

maladies chroniques ou dont l'état requiert des soins prolongés.

Autres — Hôpital qui se spécialise dans le traitement d'un nombre restreint de maladies ou de traumatismes, ou qui n'admet que les malades d'un groupe d'âge ou d'un sexe particulier (par ex. orthopédie, maternité, neurologie, cancer). L'hôpital qui offre divers genres de services et qui ne peut être classé dans aucune des catégories susmentionnées est compris dans ce groupe. "Autres" comprend en outre les postes de soins infirmiers et les hôpitaux éloignés.

Genre d'unité

Maladies aiguës

Il s'agit des unités où sont traités les malades dont l'état, au moment de leur admission, requiert des services intensifs de diagnostic et de traitements et (ou) des soins infirmiers spécialisés et une attention médicale soutenue.

Maladies de longue durée

Convalescence et (ou) réadaptation — désigne les unités servant aux soins et au traitement des malades:

- (a) qui ont franchi le stade critique ou grave et dont l'état peut être amélioré par des soins infirmiers et médicaux spécialisés dans un hôpital, et (ou)
- (b) dont l'état d'impotence peut être amélioré par des traitements de réadaptation à l'hôpital.

Maladies chroniques et (ou) soins prolongés — désigne les unités soignant les malades souffrant de maladies chroniques ou de longue durée, ou dont l'état requiert des soins infirmiers et médicaux continus dans un hôpital.

Autres — Lorsque les unités n'entrent pas dans les catégories ci-dessus.

Table Interpretation

Various statistical values are presented to enable a comprehensive analysis and explain existing differences in rates among employment categories according to academic qualifications of personnel.

Quartile values were deleted in cases where less than 4 nurses were involved.

Much of the intent, method and terminology associated with the survey can be obtained by reference to the Instructions and Definitions and the Questionnaire reproduced in the appendix of this report.

First quartile

The salary below which 25 per cent of the nurses earn less and 75 per cent earn more.

Median (or second quartile)

The salary at which point 50 per cent earn less and 50 per cent earn more. $\,$

Third quartile

The salary below which 75 per cent of the nurses earn less and 25 per cent earn more.

The mean

The "average" salary obtained by dividing total salaries for any given group by the number of nurses comprising the group. The mean therefore can by influenced by the frequency of unusually high or low observations.

Mean minimum - mean maximum

The average of the minimums and maximums reported as representing the range in annual salaries for any particular group.

Unpublished Data

Generally, all data as collected on the Questionnaire are available to those wishing more detailed information on particular groupings. However, it should be noted that information which would reveal the situation of individuals must be suppressed.

Inquiries with respect to this publication should be directed to:

The Chief, Health Manpower Section, Health & Welfare Division, Statistics Canada, Ottawa, Ontario K1A 025

Interprétation des tableaux

Diverses valeurs statistiques sont données pour permettre d'effectuer une analyse complète et d'expliquer les différences de taux entre les catégories d'emplois suivant le niveau de formation professionnelle.

Dans les cas où il y avait moins de quatre infirmières les quartiles n'ont pas été établis.

On peut trouver bon nombre de renseignements sur l'objectif, la méthode et la terminologie de l'enquête dans les <u>Directives et définitions</u> et dans le questionnaire reproduit en appendice au présent rapport.

Premier quartile

Traitement plafond du premier quart des infirmières, dans l'ordre croissant des traitements.

Médiane (deuxième quartile)

Traitement plafond de la première moitié des infirmières, dans l'ordre croissant des traitements.

Troisième quartile

Traitement plafond des trois premiers quarts des infirmières, dans l'ordre croissant des traitements.

Moyenne

Le traitement "moyen" obtenu en divisant la somme des traitements d'un groupe donné par le nombre d'infirmières constituant ce groupe. La moyenne peut ainsi être influencée par la présence d'observations exceptionnellement élevées ou exceptionnellement faibles.

Moyenne minimun - moyenne maximum

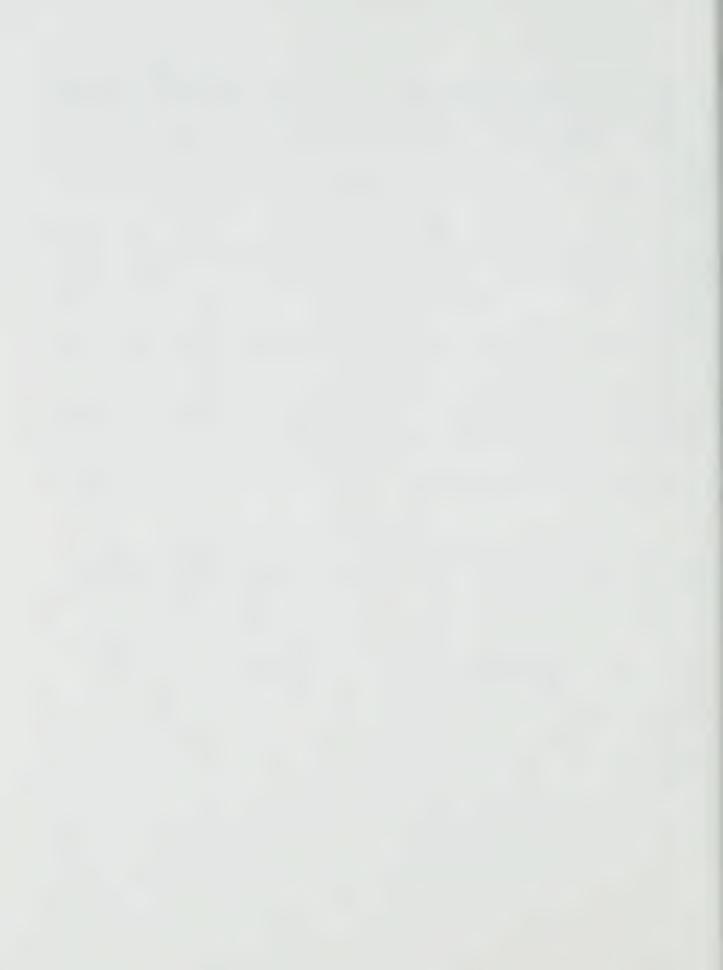

La moyenne des minimums et des maximums des barèmes déclarés des traitements annuels d'un groupe donné.

Données non publiées

En général, tous les renseignements du questionnaire peuvent être fournis à ceux qui désirent des statistiques plus détaillés sur certains groupes. Toutefois, il y a lieu de noter que les renseignements qui révéleraient la situation des individus ne peuvent être dévoilés.

INTRODUCTION

This report is one of the planned series of biennial reports on annual salaries of hospital nursing personnel, employed full-time in public hospitals in Canada. This particular report which deals with 1972 salaries was published somewhat later than expected due to the late settling of nursing contracts in some of the provinces. The data contained herein were obtained by means of a voluntary survey and represent the situation as reported by the hospitals for a particular point in time (May 15, 1972 and July 1, 1972 in the case of Quebec). No attempts were made to estimate for under-coverage in any areas.

HIGHLIGHTS

In 1972 there were 1,185 public hospitals operating in Canada. The 975 hospitals that reported, represented 82.3 % of the total universe, down 0.8 % from 1970. Again response rates fluctuated according to size and type of hospital.

In 1972 the mean salary for general duty registered nurses in public general hospitals was \$7,575 (statement 1). This figure was not available from 1970 data. Statement 1 also shows the average salaries at the various educational levels. Generally, salaries were 16.6 % higher in 1972 than in 1970. The highest increase occurred in the category where registered nurses reported "one year - University diplomas". Data for general duty registered nurses with a Master's degree in nursing are not shown since they would represent less than 3 nurses.

Statement 2 shows the mean minimums and mean maximums of the established salary ranges for general duty registered nurses in public general hospitals by academic qualification. The average minimum and maximum for all general duty registered nurses in public general hospitals were \$6,920 and \$8,562; respectively. Again the mean salary range for general duty nurses with a Master's is not shown since less than 3 nurses reported having a Master's degree.

Mean annual salaries of general duty registered nurses in public general hospitals varied significantly from province to province and in the Territories in 1972 (Statement 3). Lowest was Newfoundland with \$6,370 followed by Prince Edward Island with \$6,518 and the highest were British Columbia with \$8,431 and Ontario with \$7,695. Increases in salaries over 1970 ranged from 11.5 % in the Northwest Territories and $13.4\ \%$ in P.E.I., to 24.2 % and 22.2 % in New Brunswick and Newfoundland, respectively. As in 1970, salaries in 1972 were lower in the Maritimes than anywhere else in Canada. The lowest mean annual salary in Western Canada was \$7,077, in Saskatchewan, which was still slightly higher than the highest average annual salary in the Maritimes, \$7,046, in New Brunswick. There were no public hospitals operating in the Yukon in 1972.

Chart 2 shows the mean salaries of graduate nurses without additional qualifications by employment category, in public general hospitals. Directors of Nursing Education received the highest average annual salary at this educational level in 1972. Teachers received an increase of 18.1 % in mean salaries over 1970, indicated in Statement 4. Overall, average annual salaries of graduate nurses without additional qualifications increased 16.3 % over 1970. The weighted mean salary paid to Assistant Directors of Nursing as indicated in Statement 4 and again in Chart 2, is higher than the weighted mean salary paid to Directors

La présente publication s'inscrit dans la série des rapports biennaux sur la rémunération annuelle du personnel infirmier à plein temps employé dans les hôpitaux publics du Canada. Ce rapport, qui porte sur les traitements de 1972, a été publié un peu plus tard que prévu en raison du règlement tardif des contrats touchant le personnel infirmier de certaines provinces. Les données qui y sont présentées ont été obtenues grâce à une enquête à caractère non obligatoire et traduisent la situation telle qu'elle a été déclarée par les hôpitaux à une date précise (le 15 mai 1972 et le 1 riuillet 1972, dans le cas du Québec). Nous n'avons fait aucune estimation visant à tenir compte de l'insuffisance des déclarations dans quelque secteur que ce soit.

FAITS SAILLANTS

En 1972, il y avait 1,185 hôpitaux publics en activité au Canada. Les 975 hôpitaux qui ont rempli une déclaration représentaient donc 82.3 % du nombre total d'hôpitaux, soit 0.8 % de moins qu'en 1970. Ici encore, les taux de réponse variaient en fonction de la taille et du genre d'hôpital.

En 1972, le traitement moyen des infirmières autorisées de service général employées dans les hôpitaux publics généraux était de \$7,575 (état l). Les données de 1970 ne faisaient pas état du montant correspondant. L'état l indique également les traitements moyens aux divers niveaux de formation. En général, les traitements étaient plus élevés de 16.6 % en 1972 qu'en 1970. La plus forte augmentation a été enregistrée dans la catégorie où les infirmières autorisées ont déclaré "(um an) — diplôme universitaire". Les données sur les infirmières autorisées de service général détenant une maîtrise en soins infirmières ne sont pas indiquées, car elles représentent moins de 3 infirmières.

L'état 2 indique les minimums et les maximums moyens des échelles de traitements établies relativement aux infirmières autorisées de service général à l'emploi des hôpitaux généraux, selon la formation professionnelle. Le minimum et le maximum moyens pour toutes les infirmières autorisées de service général employées dans les hôpitaux généraux publics étaient de \$6,920 et de \$8,562 respectivement. Ici encore, l'échelle des traitements moyens des infirmières de service général détenant une maîtrise n'est pas indiquée, car moins de 3 infirmières ont déclaré détenir une maîtrise.

Les traitements annuels movens des infirmières autorisées de service général employées dans les hôpitaux généraux publics variaient considérablement d'une province à l'autre et dans les Territoires en 1972 (état 3). Les traitements les plus bas ont été enregistrés à Terre-Neuve (\$6,370), suivie de l'Île-du-Prince-Edouard (\$6,518), tandis que c'est en Colombie-Britannique et en Ontario qu'on trouvait les traitements les plus élevés, soit \$8,431 et \$7,695 respectivement. En 1970, les augmentations de traitement se sont échelonnées de 11.5 % dans les Territoires du Nord-Ouest et 13.4 %. dans l'Île-du-Prince-Édouard, à 24.2 % et 22.2 % au Nouveau-Brunswick et à Terre-Neuve respectivement. Comme en 1970, les traitements de 1972 étaient moins élevés dans les Maritimes que dans le reste du Canada. Le traitement annuel moyen le moins élevé dans l'Ouest du Canada était de \$7,077 en Saskatchewan, montant néanmoins un peu plus élevé que le traitement annuel moyen le plus élevé enregistré dans les Maritimes (\$7,046), plus particulièrement au Nouveau-Brunswick. Aucun hôpital public n'était en activité au Yukon en 1972.

Le graphique 2 indique le traitement moyen des infirmières diplômées sans autre titre professionnel par catégorie d'emploi, dans les hôpitaux publics généraux. Les directrices de l'enseignement infirmier recevaient le traitement annuel moyen le plus élevé à ce niveau de scolarité en 1972. L'état 4 indique que les enseignants ont bénéficié d'une augmentation de leur traitement annuel moyen de 18.1 % par rapport à 1970. Dans l'ensemble, les traitements annuels moyens des infirmières diplômées sans autre titre professionnel ont augmenté de 16.3 % par rapport à 1970. Le traitement moyen pondéré versé aux directrices adjointes des soins infirmiers, comme l'indiquent l'état 4 et le graphique 2, est plus élevé que le

of Nursing, due to the high frequency of Directors in the smaller hospitals where they were paid at a lower rate than Assistant Directors in the larger hospitals. See Tables 2 and 3. The unweighted mean salary for Nursing Directors in the graduate nurse "only" category in public general hospitals, was \$10,055 in 1972, while for Assistant Nursing Directors, it was \$9,812.

Statement 5 shows the average annual salaries paid to general duty registered nurses without additional qualifications in all types of public hospitals. The average salary paid by all public hospitals was \$7,545. Nurses employed in public general, non-teaching hospitals with long term units and 100-199 bed size capacity were the highest paid, averaging \$7,794. Lowest paid were nurses working in public general full teaching hospitals, less than 500 bed size group, averaging \$7,201.

Statement 6, indicates that the median standard work week for general duty registered nurses without additional qualifications in public general hospitals was 40.0, unchanged from that of 1970. The lowest median standard work week was 36.3 reported in Quebec.

Evidence of the influence of varying degrees of academic achievement upon salary rates for selected employment categories is made apparent in Chart 4. Generally, the average annual salary increased directly with increased education. The widest range occurred in the category of Nursing Directors, where graduate nurses only, without additional qualifications, averaged \$10,215 and those with a Master's degree averaged \$16,002, a differential of \$5,787. The smallest differential, \$1,274, occurred in the category of Nursing Supervisors.

traitement moyen pondéré versé aux directrices des soins infirmiers, du fait qu'un grand nombre de directrices sont employées dans de petits hôpitaux où elles sont remunérées à un taux inférieur à celui des directrices adjointes employées dans de grands hôpitaux. Voir les tableaux 2 et 3. Le traitement moyen non pondéré versé aux directrices des soins infirmiers dans la catégorie des infirmières diplômées "seulement" dans les hôpitaux publics généraux était de \$10,055 en 1972, tandis que les directrices adjointes des soins infirmiers recevaient en moyenne \$9,812.

L'état 5 indique les traitements annuels moyens versés aux infirmières autorisées de service général sans autre titre professionnel dans tous les genres d'hôpitaux publics. Le traitement moyen versé par tous les hôpitaux publics était de \$7,545. Les infirmières employées dans des hôpitaux publics généraux sans enseignement, offrant une capacité pour malades à long terme de 100 à 199 lits, recevaient les traitements les plus élevés, soit en moyenne \$7,794. Les moins bien rémunérées étaient les infirmières employées dans les hôpitaux publics généraux d'enseignement, offrant une capacité de moins de 500 lits, qui recevaient en moyenne \$7,201.

L'état 6 indique que la semaine médiane normale de travail des infirmières autorisées de service général sans autre titre professionnel employées dans les hôpitaux publics généraux était de 40.0 heures, nombre resté inchangé depuis 1970. La semaine normale médiane la plus courte était de 36.3 heures au Québec.

Le graphique 4 fait état de l'influence des divers niveaux de scolarité sur les taux de traîtements relativement à certaines catégories d'emploi. De façon générale, le traîtement annuel moyen augmentait en fonction du niveau d'instruction. L'écart le plus large a été enregistré dans la catégorie des directrices des soins infirmiers, où les infirmières diplômées seulement, sans autre titre professionnel, recevaient en moyenne \$10,215 et celles qui détenaient une maîtrise recevaient en moyenne \$16,002, ce qui représente une différence de \$5,787. La différence la plus faible, soit \$1,274, a été enregistrée dans la catégorie des surveillantes des infirmières.

INSTRUCTIONS AND DEFINITIONS FOR THE COMPLETION OF THE NURSING STAFF SALARY QUESTIONNAIRE, 1972

GENERAL

Statistics Canada has been requested by a number of public bodies, government departments and hospital authorities to conduct and expand the nursing salary survey started in 1968. Accordingly, we have entered into agreement with various parties to approach hospitals all across Canada for salary and employment data for all full-time personnel employed in the nursing categories outlined.

For information to be reliable and of value, each and every hospital is urged to complete this questionnaire and return it to Statistics Canada at Ottawa before July 31, 1972.

STAFF TO BE INCLUDED

All graduate nurses and qualified nursing assistants employed by the hospital on a full-time basis as at May 15, 1972 and functioning within the nursing services or in nursing education are to be included in this survey. If a member of this staff is employed in a dual position record data for her against the category of employment in which she spends the major portion of her time.

ANNUAL SALARY RATES AND RANGES

Please round to the nearest dollar and quote the annual salary rates and ranges in effect as at May 15, 1972. However, if you have negotiated new salary scales, not yet implemented, but which are retroactive to a date earlier than May 15, 1972, please quote the new rates.

USE OF FORMS

Please note that one page is to be completed and returned for each of the following EMPLOYMENT CATEGORIES (01 to 12) in which you had staff employed as at May 15. 1972.

EMPLOYMENT CATEGORIES:

Graduate nurses employed full-time as:

- 01 Nursing Directors Graduate nurses who are responsible for administering the nursing services of the hospital. Where the Nursing Director is also the chief executive officer (Administrator) of the hospital please note this fact on the reporting form.
- 02 Associate or Assistant Nursing Directors (Nursing services) Graduate nurses who assist the Nursing Director in administering the nursing services and who assume the responsibility of the Nursing Director in her absence.
- 03 <u>Nursing Supervisors</u> Graduate nurses who are responsible for:
 - the supervision of two or more nursing units or one or more special nursing units, such as the obstetrical service, operating room suite, etc., or
 - (2) the evening or night supervision of the nursing service as a whole.

<u>DIRECTIVES ET DÉFINITIONS</u> <u>QUESTIONNAIRE SUR LA</u> RÉNUMÉRATION DES INFIRMIÈRES — 1972

GÉNÉRALITÉS

Un certain nombre d'organismes publics, de ministères de l'État d'administrateurs d'hôpitaux ont demandé à Statistique Canada de reprendre et d'étendre l'enquête sur les traitements du personnel infirmier commencée en 1968. Par conséquent, nous avons convenu avec diverses parties de nous mettre en rapport avec les hôpitaux de tout le Canada afin de recueillir des données sur la rémunération et l'emploi du personnel à plein temps des catégories de soins infirmiers définies plus loin.

Pour que les renseignements soient sûrs et de valeur, il importe absolument que tous les hôpitaux remplissent le questionnaire ci-annexé et le renvoient à Statistique Canada, Ottawa, avant le 31 juillet, 1972.

PERSONNEL À INCLURE

Doivent être comprises dans la présente enquête toutes les <u>infirmières</u> <u>diplômées</u> et les <u>infirmières auxiliaires</u> <u>qualifiées</u> employées à <u>plein temps</u> par l'hôpital au 15 mai 1972 affectées aux services de soins infirmiers ou d'enseignement infirmier. Lorsqu'un membre de ce personnel occupe deux postes, consigner les données le concernant dans la catégorie d'emploi où il passe la plus grande partie de son temps.

TAUX ET ÉCHELLE DE TRAITEMENT ANNUEL

Arrondir les chiffres au dollar près et indiquer les taux et l'échelle de traitement annuel en vigueur au 15 mai 1972. Cependant, si vous avez négocié de nouvelles échelles de traitement qui n'ont pas encore été mises en vigueur mais sont rétroactives à une date antérieure au 15 mai 1972, veuillez indiquer les <u>nouveaux</u> taux.

UTILISATION DES FORMULES

Remarquer qu'il faut remplir et renvoyer une page pour chacune des catégories suivantes d'emploi (01 à 12) dont faisaient partie des membres de votre personnel au 15 mai 1972.

CATÉGORIES D'EMPLOI:

Infirmières diplômées employées à plein temps:

- 01 <u>Directrices des soins infirmiers</u> Infirmières diplômées chargées de l'administration des services des soins infirmiers de l'hôpital. Si la directrice des soins infirmiers est aussi l'administrateur en chef de l'hôpital, prière de l'indiquer sur la formule de déclaration.
- 02 <u>Directrices associées ou adjointes des soins infirmiers</u> <u>Infirmières diplômées qui aident la directrice des soins infirmiers dans l'administration des services de soins infirmiers et qui en assument la direction en son absence.</u>
- 03 $\frac{\text{Surveillantes des infirmières}}{\text{chargées:}}$ Infirmières diplômées
 - de la surveillace d'au moins deux unités de soins ou d'au moins une unité spéciale de soins, comme le service d'obstétrique, le bloc opératoire, etc., ou
 - (2) de la surveillance de l'ensemble des services de soins infirmiers durant la soirée ou la nuit.

- 04 <u>Head Nurses</u> Graduate nurses who are responsible for the administration and supervision of nursing service within a single nursing unit of the hospital.
- 05 Assistant Head Nurses Graduate nurses who are responsible for assisting the head nurse in the administration and supervision of a nursing unit, and who deputize for the head nurse in her absence and/or during the evening or night hours.
- 06 <u>General Duty Registered</u> Graduate nurses below the level of Assistant Head Nurse, who are registered with the Registered Nurses Association of the province in which the hospital is located:
 - (1) who carry out general staff duties on the wards,
 - (2) or who are assigned to special nursing service areas, such as operating room, central supply room, emergency, out-patient department, intravenous therapy, etc.
- 07 General Duty Not Registered Graduate nurses below the level of Assistant Head Nurse, who are not registered with the Registered Nurses Association of the province in which the hospital is located, and who are assigned to the duties listed in the category immediately above.
- 08 <u>Director of Nursing Education</u> A graduate nurse who is responsible for the administration and operation of the nursing education program of the hospital.
- 09 Associate or Assistant Director (Nursing Education) Graduate nurses who assist the Director in administering and operating the nursing education program of the hospital.
- $\begin{array}{c} 10 \, \, \underline{\text{Teachers}} \, \, \text{Graduate nurses whose function it is} \\ \hline \text{to act as clinical or classroom instructors in} \\ \hline \text{the nursing education program of the hospital.} \end{array}$

Qualified Nursing Assistants Employed Full-time:

11 — Currently registered, licensed or certified —
Persons below the level of graduate nurse who
have successfully completed a formal course of
nursing training and who are registered, licensed
or certified by the legally-appointed authority
of the province in which the hospital is located,
Depending on provincial legislation these
nursing personnel may be known as:

Registered Nursing Assistants, Licensed Nursing Assistants, Certified Nursing Assistants, Certified Nursing Aides, Licensed Practical Nurses.

12 — Not currently registered, licensed or certified — Persons below the level of graduate nurse who have successfully completed a formal course of nursing training and who were registered, licensed or certified in the province in which they took the training, but who are now working in another province.

EDUCATIONAL QUALIFICATIONS

Include every graduate nurse only once under the category which describes her highest level of achievement in nursing education.

- 04 <u>Infirmières en chef</u> <u>Infirmières diplômées chargées de l'administration et de la surveillance du service de soins infirmiers dans une seule unité de soins de l'hôpital.</u>
- 05 Infirmières en chef adjointes Infirmières diplômées chargées de seconder l'infirmière en chef dans l'administration et la surveillance d'une unité de soins et qui la dirigent en l'absence de l'infirmière en chef et (ou) dans la soirée ou la nuit,
- 06 <u>Service général (autorisées)</u> Infirmières diplômées audessous du niveau d'infirmière en chef adjointe, qui sont immatriculées auprès de l'association des infirmières autorisées de la province où est situé l'hôpital et qui:
 - (1) remplissent les fonctions générales du personnel dans les quartiers, $% \left(\frac{1}{2}\right) =\frac{1}{2}\left(\frac{1}{2}\right) \left(\frac{1}{2}\right$
 - (2) ou sont affectées à des secteurs spéciaux du service infirmier, tels que la salle d'opération, le service central de distribution, l'urgence, le service de consultation externe, la thérapie par intraveineuses, etc.
- 07 Service général Non autorisées Infirmières diplômées au-dessous du niveau d'infirmière en chef adjointe, <u>qui</u>
 <u>ne sont pas</u> immatriculées auprès de l'association des infirmières autorisées de la province où est situé l'hôpital et qui sont affectées aux fonctions énumérées dans la catégorie précédente (06).
- 08 Directrices de l'enseignement'infirmier Infirmières diplômées chargées de la direction et de l'application du programme d'enseignement infirmier de l'hôpital.
- 09 Directrices associées ou adjointes de l'enseignement infirmier Infirmières diplômées qui aident la directrice à diriger et à appliquer le programme d'enseignement infirmier de l'hôpital.
- 10 Personnel enseignant Infirmières diplômées dont la fonction consiste à donner des leçons cliniques ou théoriques dans le cadre du programme d'enseignement infirmier de l'hôpital.

Infirmières auxiliaires qualifiées employés à plein temps

11 — Autorisées, licenciées ou agréées — Personnes au-dessous du niveau d'infirmière diplômées qui ont achevé avec succès un cours régulier de formation professionnelle et qui sont autorisées, licenciées ou agréées par l'autorité juridique de la province où est situé l'hôpital. Selon les lois de chaque province, ces infirmières sont appelées.

Infirmières-auxiliaires autorisées, Infirmières-auxiliaires licenciées, Infirmières-auxiliaires agréées, Aides-infirmières agréées, Infirmières licenciées non agréées.

12 - Non autorisées, non licenciées non agréées - Personne au-dessous du niveau d'infirmière diplômée qui ont achevé avec succès un cours régulier de formation professionnelle et qui ont été autorisées, licenciées ou agréées dans la province où elles ont suivi ce cours, mais qui travaillent présentement dans une autre province.

TITRES PROFESSIONNELS

Chaque infirmière diplômée ne doit figurer que dans la catégorie qui décrit le niveau le plus élevé atteint par elle dans l'enseignement infirmier.

Graduate nurse only — Graduation from recognized nursing schools providing training up to the level which is a prerequisite to registration as an "R.N." by the Registered Nurses Association of the province.

Clinical post-graduate training — A graduate nurse whose nursing education includes a post-graduate course, of at least three months duration, in a clinical specialty such as obstetrics, pediatrics, surgical techniques, etc.

<u>University diploma (one year)</u> — A graduate nurse who has obtained a university diploma for one year of study in a recognized course focussed upon the nursing sciences.

Bachelor's degree in nursing — A graduate nurse who has obtained a bachelor's degree in the nursing sciences from a university of recognized standing.

 $\underline{\text{Master's degree in nursing}}$ — A graduate nurse who has obtained a master's degree in the nursing sciences from a university of recognized standing.

<u>Standard work week in hours</u> — Enter against the appropriate category the usual work week for nursing personnel in that category in your hospital. Round all hours to one decimal place, e.g. 40 = 40.0, 36.25 = 36.3, etc.

Annual Salary Range as at May 15, 1972 — Enter against the appropriate line and column the minimum and maximum annual salary rate (excluding shift differentials) for the salary range for each category in which nursing staff are employed in your hospital as at May 15, 1972. Round all figures to the nearest dollar.

If you have negotiated a new scale of salaries, which are not yet implemented, but which are retroactive to a date earlier than May 15, 1972, please quote the new rates.

If you have no incremental salary range in effect but only a single rate effective for a particular category of nursing staff, leave the salary range blank.

Actual Annual Salary Rates Paid as of May 15, 1972

If the salary levels for your hospital extend beyond the 16 levels provided for on the reporting form, please report the data for the additional levels on the corresponding line (any col.) on the reverse side of the form.

Please convert all salaries or wages to an annual rate. If certain staff, such as Qualified Nursing Assistants, are paid at an hourly rate convert this to an annual rate by multiplying the hourly rate by the number of paid hours in the year. Calculate the number of paid hours in the year by multiplying the normal work week by 52. Round all annual salary rates to the nearest dollar.

Following is an example of a hospital which has 163 graduate nurses employed full-time as at May 15, 1972 where the standard work week for all categories was 40 hours. Follow the example carefully to observe how the schedule should be completed. One page of the questionnaire is required for each of the five employment categories represented in the sample hospital. The method for completion of the forms is shown in the accompanying sample, using category No. 06 (General Duty-Registered) as an illustration.

<u>Infirmières diplômées seulement</u> — Grade délivré par les écoles reconnues de sciences infirmières dispensant des cours de formation professionnelle jusqu'au niveau requis pour l'immatriculation comme "infirmière autorisée" par l'association des infirmières autorisées de la province.

Formation clinique post-scolaire — Désigne une infirmière diplômée dont la formation en soins infirmiers comprend un cours post-scolaire, de spécialisation clinique de trois mois au moins, comme l'obstétrique, la pédiatrie, les techniques chirurgicales, etc.

<u>Diplôme universitaire (un an)</u> — Désigne une infirmière diplômée qui a obtenu un diplôme universitaire après avoir suivi pendant une année un cours reconnu de sciences infirmières.

Baccalauréat en soins infirmiers — Désigne une infirmière diplômée qui détient un baccalauréat des sciences infirmières d'une université reconnue.

<u>Maîtrise en soins infirmiers</u> — Désigne une infirmière diplômée qui détient une maîtrise des sciences infirmières d'une université reconnue,

<u>Semaine normale de travail en heures</u> — Inscrire en regard de la catégorie appropriée le nombre d^{$\bar{1}$}heures de la semaine habituelle de travail du personnel infirmier de votre hôpital dans cette catégorie. Arrondir toutes les heures à un point décimal, par exemple, 40 = 40.0, 36.25 = 36.3, etc.

Échelle du traitement annuel au 15 mai 1972 — Inscrire sur la ligne et dans la colonne appropriée le taux du traitement annuel minimum et maximum (en excluant les primes pour travail de nuit) de l'échelle de traitement pour chaque catégorie dont fait partie le personnel infirmier employé par votre hôpital au 15 mai 1972. Arrondir tous les chiffres au dollar près.

Si vous avez négocié une nouvelle échelle de traitement qui n'a pas encore été mise en vigueur, mais qui est rétroactive à une date antérieure au 15 mai 1972, veuillez indiquer les nouveaux taux.

S'il n'existe pas d'échelle de traitement progressif, mais seulement un taux unique pour une catégorie particulière du personnel infirmier, ne pas inscrire l'échelle de traitement annuel.

Taux annuel réel du traitement au 15 mai 1972

Si l'échelle des traitements dans votre hôpital compte plus de seize niveaux, nombre prévu dans la formule de déclaration, veuillez déclarer les niveaux supplémentaires au verso de la formule, sur la même ligne (peu importe la colonne).

Prière de convertir tous les traitements ou salaires en un taux annuel. Si certaines employées comme, par exemple, les infirmières auxiliaires qualifiées, sont payées à un taux horaire, convertir ce taux en un taux annuel en multipliant le taux horaire par le nombre d'heures de travail rémunéré de l'année. Calculer le nombre d'heures de travail rémunéré dans l'année en multipliant les heures de la semaine normale de travail par 52. Arrondir tous les taux de traitement annuel au dollar près.

Voici un exemple d'un hôpital qui a 163 infirmières diplômées employées à plein temps au 15 mai 1972 dont la semaine normale de travail pour toutes les catégories était de 40 heures. On devra remplir la formule en suivant cet exemple de près. Il faut une page du questionnaire pour chacune des cinq catégories d'emploi de l'hôpital. Le spécimen ci-joint montre la façon de remplir les formules. On a pris comme exemple la catégorie nº 06 (Service général — autorisées).

Price - Prix: \$1.40

Statistics Canada in 1967 initiated the collection of statistics on salaries paid to full-time graduate nurses employed in Canadian public general and allied special hospitals, to meet the increasing demands for this information from both government and private sectors of the economy. In 1968, the scope of the Nurses Salary Survey was expanded (by type of hospital) to cover mental institutions and tuberculosis sanatoria and (by type of employment) also to include full-time nursing assistants. The publication of this report provides a comprehensive account of the variations in salaries among hospital nursing staff by a cross-classification of employment categories and levels of academic qualifications.

Statistics Canada is indebted to the individual hospitals across the nation which have prepared their data for inclusion in a national statistical program; to the Canadian Nurses' Association for their assistance and advice; to the provincial hospital associations and the Canadian Hospital Association for their co-operation and support.

The report was prepared in the Health Manpower Section of the Health Division of Statistics Canada.

En réponse à la demande croissante de renseignements, de la part des secteurs publics et privés de l'économie, Statistique Canada a recueilli pour la première fois en 1967 des statistiques sur la rémunération des infirmières diplomées travaillant à plein temps dans les hôpitaux publics généraux et spéciaux divers du Canada. En 1968, le champ d'observation de l'enquête à été élargi de façon à englober, dans les genres d'hôpitaux, les établissements pour malades mentaux et les sanatoriums pour tuberculeux et. dans les catégories d'emplois, les infirmières auxiliaires à plein temps. Les tableaux à entrée multiple sur les catégories d'emploi et les niveaux de formation professionnelle compris dans le présent rapport donnent un exposé complet des variations de traitement du personnel infirmier des hôpitaux.

Statistique Canada tient à remercier les hôpitaux du Canada pour les renseignements qu'ils ont bien voulu fournir dans le cadre d'un programme statistique d'envergure nationale, l'Association des infirmières canadiennes pour son aide et ses conseils, les associations provinciales d'hôpitaux et l'Association des hôpitaux du Canada, pour leur concours et leur soutien.

Le rapport a été rédigé à la Section de la main-d'oeuvre sanitaire, Division de la santé, Statistique Canada.

PETER G. KIRKHAM, Chief Statistician of Canada.

Le statisticien en chef du Canada, PETER G. KIRKHAM.

 P nombres provisoires.
 r nombres rectifiés.
- * valeur représentant moins de 3 personnes.

EXPLANATORY NOTES AND GLOSSARY

Scope

Included in the survey were full-time lay nurses employed in all public general, allied special, mental and tuberculosis hospitals in operation in 1974. Table 1 gives a summary for all categories of nursing employment while Tables 2 to 11 are designed to bring out the variations by type and size of hospital as well as province, in salaries for the "graduate nurse only", group which represents the overwhelming majority of nurses involved in this survey.

Hospital

An institution which is operated for the medical, surgical and/or obstetrical care of in-patients, and which is licensed or approved as a hospital by the federal and/or a provincial government, or by a municipality duly authorized under the laws of the province. Specifically excluded are institutions primarily for tuberculosis, or psychiatric disorders.

Public Hospital

Recognized by the province as a "public hospital" which is not operated for profit and accepts all patients regardless of ability to pay.

Type of Service

General

No long-term units — Refers to a hospital which provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries. The services of a general hospital are not restricted to a specific age group or sex.

With long-term units — Refers to a hospital with a group of beds or rooms or a separate wing or building which is recognized as a distinct and separate treatment unit of the hospital. Admission normally requires formal admission procedures even when transferred from another part of the hospital.

Full-teaching hospital — Applies to a hospital which provides medical education programs, approved by the appropriate authorities, for the major (not only elective) clinical instruction in at least the medical disciplines of internal medicine and general surgery to undergraduate medical students in their final two years.

Partial-teaching hospital — Applies to a hospital which provides post-graduate medical education programs, approved by the appropriate authorities, in at least one residency program in a medical specialty.

Allied Special Hospitals

Includes children's, convalescent and/or rehabilitation, chronic and/or extended care and "other" hospitals.

Children's — A hospital which provides primarily for the diagnosis and short-term treatment of paediatric patients, generally 14 years of age and under.

Convalescent and/or rehabilitation — A hospital whose program is directed primarily to the recovery and rehabilitative phase of treatment for patients disabled by illness or injury.

Chronic and/or extended care — A hospital which provides primarily for the prolonged treatment of

NOTES EXPLICATIVES ET TERMINOLOGIE

Portée

L'enquête visait les infirmières laïques à plein temps employées dans l'ensemble des hôpitaux publics généraux, spécialisés, psychiatriques et antituberculeux en activité en 1974. Le Tableau 1 présente un résumé de toutes les catégories d'emploi du personnel infirmier, tandis que les Tableaux 2 à 11 visent à faire ressortir les variations, selon le genre et la taille de l'hôpital, ainsi que par province, de la rémunération des "infirmières diplômées seulement", groupe réunissant la grande majorité des infirmières qui font l'objet de cette enquête.

Hôpital

Établissement donnant des soins médicaux, chirurgicaux ou obstétriques aux hospitalisés et détenant un permis ou une approbation du gouvernement fédéral ou provincial ou d'une municipalité autorisée à le faire par les lois d'une province. Ne comprend pas les établissements destinés avant tout au traitement de la tuberculose ou des troubles psychiatriques.

Hôpital public

Hôpital reconnu comme tel par la province et établi dans un but non lucratif; il accepte tous les malades sans égard à leur capacité de payer.

Genre de service

Hôpital général

Sans unités de soins à long terme — S'applique à un hôpital qui se spécialise dans le diagnostic et le traitement à court terme d'un grand nombre de maladies et de traumatismes. Les services d'un hôpital général ne sont pas restreints à un groupe d'âge ou à un sexe particulier

Services de soins à long terme — Services d'un hôpital comprenant un groupe de lits ou de chambres ou une aile ou un bâtiment séparé qui est considéré comme quartier de traftement distinct. Pour y être admis, il faut en général remplir les formalités de demande d'admission, même s'il s'agit d'un transfert d'un autre quartier de l'hôpital.

Hôpital d'enseignement complet — Désigne un hôpital qui offre des programmes d'enseignement médical, dûment approuvés par les autorités compétentes, pour la formation clinique des étudiants effectuant leurs deux dernières années d'études dans les disciplines majeures (non pas seulement facultatives), dont la médecine interne et la chirurgie générale.

Hôpital d'enseignement partiel — Désigne un hôpital qui offre des programmes réguliers d'enseignement médical, dûment approuvés par les autorités compétentes, aux diplômés en médecine dans au moins un programme de résidence d'une spécialité médicale.

Hôpitaux spéciaux divers

Comprend pédiatrique, convalescence et (ou) réadaptation, chronique et (ou) soins prolongés et "autres" hôpitaux.

Pédiatrique — Hôpital qui se spécialise dans le diagnostic et le traitement à court terme des maladies chez les enfants, âgés généralement de 14 ans ou moins.

Convalescence et (ou) réadaptation — Hôpital qui s'occupe surtout du rétablissement et de la réadaptation des personnes rendues invalides par suite d'un maladie ou d'une traumatisme.

Maladies chroniques et (ou) soins prolongés — $H\hat{o}$ pital qui se spécialise dans le traitement des malades souffrant de

patients with chronic and long-term conditions.

Other — A hospital which provides primarily for the treatment of a limited range of diseases or injuries, or which restricts admissions to a particular age group or sex. Examples of such specified categories may include orthopaedic, maternity, neurological, cancer hospitals. A hospital which provides a combination of various types of service and cannot be classified in any one of the foregoing categories is included in this group. "Other" also includes Nursing Stations and Outpost Hospitals.

Type of Unit

Short-term

Those units provided for patients who at the time of admission require extensive diagnostic and treatment services and/or skilled nursing care and comprehensive medical attention.

Long-term

Convalescent and/or rehabilitation — refers to units providing for the care and treatment of patients:

- (a) who have passed the acute or emergency stage and whose condition can be improved by skilled nursing care and medical attention in a hospital and/or
- (b) who have disabling conditions which may be improved by rehabilitation treatment in hospital.

Chronic and/or extended care — refers to units providing for the care and treatment of patients suffering from chronic or long-term illnesses or conditions which require continued nursing care and medical attention in a hospital.

Other — refers to long-term units which do not clearly fall under the foregoing categories.

maladies chroniques ou dont l'état requiert des soins prolongés.

Autres — Hôpital qui se spécialise dans le traitement d'un nombre restreint de maladies ou de traumatismes, ou qui n'admet que les malades d'un groupe d'âge ou d'un sexe particulier (par ex. orthopédie, maternité, neurologie, cancer). L'hôpital qui offre divers genres de services et qui ne peut être classé dans aucune des catégories susmentionnées est compris dans ce groupe. "Autres" comprend en outre les postes de soins infirmiers et les hôpitaux éloignés.

Genre d'unité

Maladies aiguës

Il s'agit des unités où sont traités les malades dont l'état, au moment de leur admission, requiert des services intensifs de diagnostic et de traitements et (ou) des soins infirmiers spécialisés et une attention médicale soutenue.

Maladies de longue durée

Convalescence et (ou) réadaptation — désigne les unités servant aux soins et au traitement des malades:

- a) qui ont franchi le stade critique ou grave et dont l'état peut être amélioré par des soins infirmiers et médicaux spécialisés dans un hôpital, et (ou)
- b) dont l'état d'impotence peut être amélioré par des traitements de réadaptation à l'hôpital.

Maladies chroniques et (ou) soins prolongés — désigne les unités soignant les malades souffrant de maladies chroniques ou de longue durée, ou dont l'état requiert des soins infirmiers et médicaux continus dans un hôpital.

 $\label{eq:Autres} \text{Autres} - \text{Lorsque les unités } n^1 \text{entrent pas dans les catégories ci-dessus.}$

Public, other - Publics, autres

Table Interpretation

Various statistical values are presented to enable a comprehensive analysis and explain existing differences in rates among employment categories according to academic qualifications of personnel.

Quartile values were deleted in cases where less than $4\ \mathrm{nurses}$ were involved.

Much of the intent, method and terminology associated with the survey can be obtained by reference to the Instructions and Definitions and the Questionnaire reproduced in the appendix of this report.

First Quartile

The salary below which 25 per cent of the nurses earn less and 75 per cent earn more.

Median (or Second Quartile)

The salary at which point 50 per cent earn less and 50 per cent earn more. $\,$

Third Quartile

The salary below which $75~\mathrm{per}$ cent of the nurses earn less and $25~\mathrm{per}$ cent earn more.

The Mean

The "average" salary obtained by dividing total salaries for any given group by the number of nurses comprising the group. The mean therefore can by influenced by the frequency of unusually high or low observations.

Mean Minimum - Mean Maximum

The average of the minimums and maximums reported as representing the range in annual salaries for any particular group.

Unpublished Data

Generally, all data as collected on the Questionnaire are available to those wishing more detailed information on particular groupings. However, it should be noted that information which would reveal the situation of individuals must be suppressed.

Inquiries with respect to this publication should be directed to:

The Chief, Health Manpower Section, Health Division, Statistics Canada, Ottawa, Ontario KIA 0T6

Interprétation des tableaux

Diverses valeurs statistiques sont données pour permettre d'effectuer une analyse complète et d'expliquer les différences de taux entre les catégories d'emplois suivant le niveau de formation professionnelle.

Dans les cas où il y avait moins de quatre infirmières les quartiles n'ont pas été établis.

On peut trouver bon nombre de renseignements sur l'objectif, la méthode et la terminologie de l'enquête dans les <u>Directives et définitions</u> et dans le questionnaire reproduit en appendice au présent rapport.

Premier quartile

Traitement plafond du premier quart des infirmières, dans l'ordre croissant des traitements.

Médiane (deuxième quartile)

Traitement plafond de la première moitié des infirmières, dans l'ordre croissant des traitements.

Troisième quartile

Traitement plafond des trois premiers quarts des infirmières, dans l'ordre croissant des traitements.

Movenne

Le traitement "moyen" obtenu en divisant la somme des traitements d'un groupe donné par le nombre d'infirmières constituant ce groupe. La moyenne peut ainsi être influencée par la présence d'observations exceptionnellement élevées ou exceptionnellement faibles.

Moyenne minimum - Moyenne maximum

La moyenne des minimums et des maximums des barèmes déclarés des traitements annuels d'un groupe donné.

Données non publiées

En général, tous les renseignements du questionnaire peuvent être fournis à ceux qui désirent des statistiques plus détaillés sur certains groupes. Toutefois, il y a lieu de noter que les renseignements qui révéleraient la situation des individus ne peuvent être dévoilés.

INTRODUCTION

This report is one of the planned series of biennial reports on annual salaries of hospital nursing personnel, employed full-time in public hospitals in Canada. particular report which deals with 1974 salaries was published somewhat later than expected due to the late settling of nursing contracts in some of the provinces. The data contained herein were obtained by means of a voluntary survey and represent the situation as reported by the hospitals for a particular point in time (May 15, 1974). No attempts were made to estimate for undercoverage in any areas.

La présente publication s'inscrit dans la série des rapports biennaux sur la rémunération annuelle du personnel infirmier à plein temps employé dans les hôpitaux publics du Canada. Ce rapport, qui porte sur les traitements de 1974, a été publié un peu plus tard que prévu en raison du règlement tardif des contrats touchant le personnel infirmier de certaines provinces. Les données qui y sont présentées ont été obtenues grâce à une enquête à caractère non obligatoire et traduisent la situation telle qu'elle a été déclarée par les hôpitaux à une date précise (le 15 mai 1974). Nous n'avons fait aucune estimation visant à tenir compte de l'insuffisance des déclarations dans quelque secteur que ce soit.

INSTRUCTIONS AND DEFINITIONS FOR THE COMPLETION OF THE NURSING STAFF SALARY QUESTIONNAIRE, 1974

GENERAL

Statistics Canada has been requested by a number of public bodies, government departments and hospital authorities to conduct and expand the nursing salary survey started in 1968. Accordingly, we have entered into agreement with various parties to approach hospitals all across Canada for salary and employment data for all full-time personnel employed in the nursing categories outlined.

For information to be reliable and of value, each and every hospital is urged to complete this questionnaire and return it to Statistics Canada at Ottawa before July 31, 1974.

STAFF TO BE INCLUDED

All graduate nurses and qualified nursing assistants employed by the hospital on a full-time basis as at May 15, 1974 and functioning within the nursing services or in nursing education are to be included in this survey. If a member of this staff is employed in a dual position record data for her against the category of employment in which she spends the major portion of her time.

ANNUAL SALARY RATES AND RANGES

Please round to the nearest dollar and quote the annual salary rates and ranges in effect as at May 15, 1974. However, if you have negotiated new salary scales, not yet implemented, but which are retroactive to a date earlier than May 15, 1974, please quote the new rates.

USE OF FORMS

Please note that one page is to be completed and returned for each of the following EMPLOYMENT CATEGORIES (01 to 12) in which you had staff employed as at May 15, 1974.

EMPLOYMENT CATEGORIES

Graduate Nurses employed Full-time

- 01 <u>Nursing directors</u> Graduate nurses who are responsible for administering the nursing services of the hospital. Where the Nursing Director is also the chief executive officer (Administrator) of the hospital please note this fact on the reporting form.
- 02 Associate or assistant nursing directors (nursing services) Graduate nurses who assist the Nursing Director in administering the nursing services and who assume the responsibility of the Nursing Director in her absence.
- 03 Nursing supervisors Graduate nurses who are responsible for:
 - the supervision of two or more nursing units or one or more special nursing units, such as the obstetrical service, operating room suite, etc.. or
 - (2) the evening or night supervision of the nursing service as a whole.

<u>DIRECTIVES ET DÉFINITIONS</u> QUESTIONNAIRE SUR LA RÉNUMÉRATION DES INFIRMIÈRES — 1974

GÉNÉRALITÉS

Un certain nombre d'organismes publics, de ministères de l'État d'administrateurs d'hôpitaux ont demandé à Statistique Canada de reprendre et d'étendre l'enquête sur les traitements du personnel infirmier commencée en 1968. Par conséquent, nous avons convenu avec diverses parties de nous mettre en rapport avec les hôpitaux de tout le Canada afin de recueillir des données sur la rémunération et l'emploi du personnel à plein temps des catégories de soins infirmiers définies plus loin.

Pour que les renseignements soient sûrs et de valeur, il importe absolument que tous les hôpitaux remplissent le questionnaire ci-annexé et le renvoient à Statistique Canada, Ottawa, avant le 31 juillet, 1974.

PERSONNEL À INCLURE

Doivent être comprises dans la présente enquête toutes les <u>infirmières</u> <u>diplômées</u> et les <u>infirmières auxiliaires</u> <u>qualifiées employées à plein temps</u> par l'hôpital au 15 mai 1974 affectées aux services de soins infirmiers ou d'enseignement infirmier. Lorsqu'un membre de ce personnel occupe deux postes, consigner les données le concernant dans la catégorie d'emploi où il passe la plus grande partie de son temps.

TAUX ET ÉCHELLE DE TRAITEMENT ANNUEL

Arrondir les chiffres au dollar près et indiquer les taux et l'échelle de traitement annuel en vigueur au 15 mai 1974. Cependant, si vous avez négocié de nouvelles échelles de traitement qui n'ont pas encore été mises en vigueur mais sont rétroactives à une date antérieure au 15 mai 1974, veuillez indiquer les nouveaux taux.

UTILISATION DES FORMULES

Remarquer qu'il faut remplir et renvoyer une page pour chacune des catégories suivantes d'emploi (01 à 12) dont faisaient partie des membres de votre personnel au 15 mai 1974.

CATÉGORIES D'EMPLOI

Infirmières diplômées employées à plein temps

- 01 <u>Directrices des soins infirmiers</u> Infirmières diplômées chargées de l'administration des services des soins infirmiers de l'hôpital. Si la directrice des soins infirmiers est aussi l'administrateur en chef de l'hôpital, prière de l'indiquer sur la formule de déclaration.
- 02 <u>Directrices associées ou adjointes des soins infirmiers</u> <u>Infirmières diplômées qui aident la directrice des soins infirmiers dans l'administration des services de soins infirmiers et qui en assument la direction en son absence.</u>
- 03 $\frac{\text{Surveillantes des infirmières}}{\text{chargées:}}$ Infirmières diplômées
 - (1) de la surveillace d'au moins deux unités de soins ou d'au moins une unité spéciale de soins, comme le service d'obstétrique, le bloc opératoire, etc., ou
 - (2) de la surveillance de l'ensemble des services de

- 04 <u>Head nurses</u> Graduate nurses who are responsible for the administration and supervision of nursing service within a single nursing unit of the hospital.
- 05 Assistant head nurses Graduate nurses who are responsible for assisting the head nurse in the administration and supervision of a nursing unit, and who deputize for the head nurse in her absence and/or during the evening or night hours.
- 06 General duty Registered Graduate nurses below the level of Assistant Head Nurse, who are registered with the Registered Nurses Association of the province in which the hospital is located;
 - (1) who carry out general staff duties on the wards.
 - (2) or who are assigned to special nursing service areas, such as operating room, central supply room, emergency, out-patient department, intravenous therapy, etc.
- 07 General duty Not registered Graduate nurses below the level of Assistant Head Nurse, who are not registered with the Registered Nurses Association of the province in which the hospital is located, and who are assigned to the duties listed in the category immediately above.
- 08 Director of nursing education A graduate nurse who is responsible for the administration and operation of the nursing education program of the hospital.
- 09 Associate or assistant director (nursing education) Graduate nurses who assist the Director in administering and operating the nursing education program of the hospital.
- 10 <u>Teachers</u> Graduate nurses whose function it is to act as clinical or classroom instructors in the nursing education program of the hospital.

Qualified Nursing Assistants employed Full-time

11 - Currently registered, licensed or certified Persons below the level of graduate nurse who
have successfully completed a formal course of
nursing training and who are registered, licensed
or certified by the legally-appointed authority
of the province in which the hospital is located.
Depending on provincial legislation these
nursing personnel may be known as:

Registered Nursing Assistants, Licensed Nursing Assistants, Certified Nursing Assistants, Certified Nursing Aides, Licensed Practical Nurses.

12 - Not currently registered, licensed or certified - Persons below the level of graduate nurse who have successfully completed a formal course of nursing training and who were registered, licensed or certified in the province in which they took the training, but who are now working in another province.

EDUCATIONAL QUALIFICATIONS

Include every graduate nurse only once under the category which describes her highest level of achievement in nursing education.

- 04 <u>Infirmières en chef</u> <u>Infirmières diplômées chargées de</u> l'administration et de la surveillance du service de soins infirmières dans une seule unité de soins de l'hômital.
- 05 <u>Infirmières en chef adjointes</u> Infirmières diplômées chargées de seconder l'infirmière en chef dans l'administration et la surveillance d'une unité de soins et qui la dirigent en l'absence de l'infirmière en chef et (ou) dans la soirée ou la nuit,
- 06 <u>Service général (autorisées)</u> Infirmières diplômées audessous du niveau d'infirmière en chef adjointe, qui sont immatriculées auprès de l'association des infirmières autorisées de la province où est situé l'hôpital et qui:
 - $\hspace{1.5cm} \hbox{(1) remplissent les fonctions générales du personnel dans } \\ \hspace{1.5cm} \hbox{les quartiers,}$
 - (2) ou sont affectées à des secteurs spéciaux du service infirmier, tels que la salle d'opération, le service central de distribution, l'urgence, le service de consultation externe, la thérapie par intraveineuses, etc.
- 07 Service général Non autorisées Infirmières diplômées au-dessous du niveau d'infirmière en chef adjointe, <u>qui</u> <u>ne sont pas</u> immatriculées auprès de l'association des infirmières autorisées de la province où est situé l'hôpital et qui sont affectées aux fonctions énumérées dans la catégorie précédente (06).
- 08 Directrices de l'enseignement infirmier Infirmières diplômées chargées de la direction et de l'application du programme d'enseignement infirmier de l'hôpital.
- 09 <u>Directrices associées ou adjointes de l'enseignement infirmier</u> Infirmières diplômées qui aident la directrice à diriger et à appliquer le programme d'enseignement infirmier de l'hôpital.
- 10 <u>Personnel enseignant</u> Infirmières diplômées dont la fonction consiste à donner des leçons cliniques ou théoriques dans le cadre du programme d'enseignement infirmier de l'hôpital.

Infirmières auxiliaires qualifiées employés à plein temps

11 — Autorisées, licenciées ou agréées — Personnes au-dessous du niveau d'infirmière diplômées qui ont achevé avec succès un cours régulier de formation professionnelle et qui sont autorisées, licenciées ou agréées par l'autorité juridique de la province où est situé l'hôpital. Selon les lois de chaque province, ces infirmières sont appelées.

Infirmières-auxiliaires autorisées, Infirmières-auxiliaires licenciées, Infirmières-auxiliaires agréées, Aides-infirmières agréées, Infirmières licenciées non agréées.

12 - Non autorisées, non licenciées non agréées - Personne au-dessous du niveau d'infirmière diplômée qui ont achevé avec succès un cours régulier de formation professionnelle et qui ont été autorisées, licenciées ou agréées dans la province où elles ont suivi ce cours, mais qui travaillent présentement dans une autre province.

TITRES PROFESSIONNELS

Chaque infirmière diplômée ne doit figurer que dans la catégorie qui décrit le niveau le plus élevé atteint par elle dans l'enseignement infirmier.

Graduate nurse only — Graduation from recognized nursing schools providing training up to the level which is a prerequisite to registration as an "R.N." by the Registered Nurses Association of the province.

Clinical post-graduate training — A graduate nurse whose nursing education includes a post-graduate course, of at least three months duration, in a clinical specialty such as obstetrics, pediatrics, surgical techniques, etc.

<u>University diploma (one year)</u> — A graduate nurse who has obtained a university diploma for one year of study in a recognized course focussed upon the nursing sciences.

Bachelor's degree in nursing — A graduate nurse who has obtained a bachelor's degree in the nursing sciences from a university of recognized standing.

<u>Master's degree in nursing</u> — A graduate nurse who has obtained a master's degree in the nursing sciences from a university of recognized standing.

Standard work week in hours — Enter against the appropriate category the usual work week for nursing personnel in that category in your hospital. Round all hours to one decimal place, e.g. 40 = 40.0, 36.25 = 36.3, etc.

Annual salary range as at May 15, 1974 — Enter against the appropriate line and column the minimum and maximum annual salary rate (excluding shift differentials) for the salary range for each category in which nursing staff are employed in your hospital as at May 15, 1974. Round all figures to the nearest dollar.

If you have negotiated a new scale of salaries, which are not yet implemented, but which are retroactive to a date earlier than May 15, 1974, please quote the new rates.

If you have no incremental salary range in effect but only a single rate effective for a particular category of nursing staff, leave the salary range blank.

Actual Annual Salary Rates Paid as of May 15, 1974

If the salary levels for your hospital extend beyond the 16 levels provided for on the reporting form, please report the data for the additional levels on the corresponding line (any col.) on the reverse side of the form.

Please convert all salaries or wages to an annual rate. If certain staff, such as Qualified Nursing Assistants, are paid at an hourly rate convert this to an annual rate by multiplying the hourly rate by the number of paid hours in the year. Calculate the number of paid hours in the year by multiplying the normal work week by 52. Round all annual salary rates to the nearest dollar.

Following is an example of a hospital which has 163 graduate nurses employed full-time as at May 15, 1974 where the standard work week for all categories was 40 hours. Follow the example carefully to observe how the schedule should be completed. One page of the questionnaire is required for each of the five employment categories represented in the sample hospital. The method for completion of the forms is shown in the accompanying sample, using category No. 06 (General Duty-Registered) as an illustration.

<u>Infirmières diplômées seulement</u> — Grade délivré par les écoles reconnues de sciences infirmières dispensant des cours de formation professionnelle jusqu'au niveau requis pour l'immatriculation comme "infirmière autorisée" par l'association des infirmières autorisées de la province.

<u>Formation clinique post-scolaire</u> — Désigne une infirmière diplômée dont la formation en soins infirmiers comprend un cours post-scolaire, de spécialisation clinique de trois mois au moins, comme l'obstétrique, la pédiatrie, les techniques chirurgicales, etc.

<u>Diplôme universitaire (un an)</u> — Désigne une infirmière diplômée quí a obtenu un diplôme universitaire après avoir suivi pendant une année un cours reconnu de sciences infirmières.

Baccalauréat en soins infirmiers — Désigne une infirmière diplômée qui détient un baccalauréat des sciences infirmières d'une université reconnue.

<u>Maîtrise en soins infirmiers</u> — Désigne une infirmière diplômée qui détient une maîtrise des sciences infirmières d'une université reconnue.

Semaine normale de travail en heures — Inscrire en regard de la catégorie appropriée le nombre d'heures de la semaine habituelle de travail du personnel infirmier de votre hôpital dans cette catégorie. Arrondir toutes les heures à un point décimal, par exemple, 40 = 40.0, 36.25 = 36.3, etc.

Échelle du traitement annuel au 15 mai 1974 - Inscrire sur la ligne et dans la colonne appropriée le taux du traitement annuel minimum et maximum (en excluant les primes pour travail de nuit) de l'échelle de traitement pour chaque catégorie dont fait partie le personnel infirmier employé par votre hôpital au 15 mai 1974. Arrondir tous les chiffres au dollar près.

Si vous avez négocié une nouvelle échelle de traitement qui n'a pas encore été mise en vigueur, mais qui est rétroactive à une date antérieure au 15 mai 1974, veuillez indiquer les nouveaux taux.

S'il n'existe pas d'échelle de traitement progressif, mais seulement un taux unique pour une catégorie particulière du personnel infirmier, ne pas inscrire l'échelle de traitement annuel.

Taux annuel réel du traitement au 15 mai 1974

Si l'échelle des traitements dans votre hôpital compte plus de seize niveaux, nombre prévu dans la formule de déclaration, veuillez déclarer les niveaux supplémentaires au verso de la formule, sur la même ligne (peu importe la colonne).

Prière de convertir tous les traitements ou salaires en un taux annuel. Si certaines employées comme, par exemple, les infirmières auxiliaires qualifiées, sont payées à un taux horaire, convertir ce taux en un taux annuel en multipliant le taux horaire par le nombre d'heures de travail rémunéré de l'année. Calculer le nombre d'heures de travail rémunéré dans l'année en multipliant les heures de la semaine normale de travail par 52. Arrondir tous les taux de traitement annuel au dollar près.

Voici un exemple d'un hôpital qui a 163 infirmières diplômées employées à plein temps au 15 mai 1974 dont la semaine normale de travail pour toutes les catégories était de 40 heures. On devra remplir la formule en suivant cet exemple de près. Il faut une page du questionnaire pour chacune des cinq catégories d'emploi de l'hôpital. Le spécimen ci-joint montre la façon de remplir les formules. On a pris comme exemple la catégorie n° 06 (Service général — autorisées).

Edmonton	(425-5052)
Vancouver	(666-3594)

PREFACE

Statistics Canada in 1967 initiated the collection of statistics on salaries paid to full-time graduate nurses employed in Canadian public general and allied special hospitals, to meet the increasing demands for this information from both government and private sectors of the economy. In 1968, the scope of the Nurses Salary Survey was expanded (by type of hospital) to cover mental institutions and tuberculosis sanatoria and (by type of employment) also to include full-time nursing assistants. The publication of this report provides a comprehensive account of the variations in salaries among hospital nursing staff by a cross-classification of employment categories and levels of academic qualifications.

Statistics Canada is indebted to the individual hospitals across the nation which have prepared their data for inclusion in a national statistical program; to the Canadian Nurses' Association for their assistance and advice; to the provincial hospital associations and the Canadian Hospital Association for their co-operation and support.

The report was prepared in the Health Manpower Section of the Health Division of Statistics Canada.

PRÉFACE

En réponse à la demande croissante de renseignements, de la part des secteurs publics et privés de l'économie, Statistique Canada a recueilli pour la première fois en 1967 des statistiques sur la rémunération des infirmières diplômées travaillant à plein temps dans les hôpitaux publics généraux et spéciaux divers du Canada. En 1968, le champ d'observation de l'enquête a été élargi de façon à englober, dans les genres d'hôpitaux, les établissements pour malades mentaux et les sanatoriums pour tuberculeux et, dans les catégories d'emplois, les infirmières auxiliaires à plein temps. Les tableaux à entrée multiple sur les catégories d'emploi et les niveaux de formation professionnelle compris dans le présent rapport donnent un exposé complet des variations de traitement du personnel infirmier des hôpitaux.

Statistique Canada tient à remercier les hôpitaux du Canada pour les renseignements qu'ils ont bien voulu fournir dans le cadre d'un programme statistique d'envergure nationale, l'Association des infirmières canadiennes pour son aide et ses conseils, les associations provinciales d'hôpitaux et l'Association des hôpitaux du Canada, pour leur concours et leur soutien.

Le rapport a été rédigé à la Section de la maind'oeuvre sanitaire, Division de la santé, Statistique Canada.

PETER G. KIRKHAM, Chief Statistician of Canada. Le statisticien en chef du Canada, PETER G. KIRKHAM.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- * Value represents less than 3 individuals.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- * valeur représentant moins de 3 personnes.

Scope

Included in the survey were full-time lay nurses employed in all public general, allied special, mental and tuberculosis hospitals in operation in 1976. Table 1 gives a summary for all categories of nursing employment while Tables 2 - 11 are designed to bring out the variations by type and size of hospital as well as province, in salaries for the "graduate nurse only" group, which represents the overwhelming majority of nurses involved in this survey.

Hospital

An institution which is operated for the medical, surgical and/or obstetrical care of in-patients, and which is licensed or approved as a hospital by the federal and/or a provincial government, or by a municipality duly authorized under the laws of the province. Specifically excluded are institutions primarily for tuberculosis, or psychiatric disorders.

Public Hospital

Recognized by the province as a "public hospital" which is not operated for profit and accepts all patients regardless of ability to pay.

Type of Service

General

No long-term units — Refers to a hospital which provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries. The services of a general hospital are not restricted to a specific age group or sex.

With long-term units — Refers to a hospital with a group of beds or rooms or a separate wing or building which is recognized as a distinct and separate treatment unit of the hospital. Admission normally requires formal admission procedures even when transferred from another part of the hospital.

Full-teaching hospital — Applies to a hospital which provides medical education programs, approved by the appropriate authorities, for the major (not only elective) clinical instruction in at least the medical disciplines of internal medicine and general surgery to undergraduate medical students in their final two years.

Partial-teaching hospital — Applies to a hospital which provides post-graduate medical education programs, approved by the appropriate authorities, in at least one residency program in a medical specialty.

Portée

L'enquête visait les infirmières laïques à plein temps employées dans l'ensemble des hôpitaux publics généraux, spécialisés, psychiatriques et antituberculeux en activité en 1976. Le tableau 1 présente un résumé de toutes les catégories d'emploi du personnel infirmier, tandis que les tableaux 2 - 11 visent à faire ressortir les variations, selon le genre et la taille de l'hôpital, ainsi que par province, de la rémunération des "infirmières diplômées seulement" groupe, réunissant la grande majorité des infirmières qui font l'objet de cette enquête.

Hôpital

Établissement donnant des soins médicaux, chirurgicaux ou obstétriques aux hospitalisés et détenant un permis ou une approbation du gouvernement fédéral ou provincial ou d'une municipalité autorisée à le faire par les lois d'une province. Ne comprend pas les établissements destinés avant tout au traitement de la tuberculose ou des troubles psychiatriques.

Hôpital public

Hôpital reconnu comme tel par la province et établi dans un but non lucratif; il accepte tous les malades sans égard à leur capacité de payer.

Genre de service

Hôpital général

Sans unités de soins à long terme — S'applique à un hôpital qui se spécialise dans le diagnostic et le traitement à court terme d'un grand nombre de maladies et de traumatismes. Les services d'un hôpital général ne sont pas restreints à un groupe d'âge ou à un sexe particulier.

Services de soins à long terme — Services d'un hôpital comprenant un groupe de lits ou de chambres ou une aile ou un bâtiment séparé qui est considéré comme quartier de traitement distinct. Pour y être admis, il faut en général remplir les formalités de demande d'admission, même s'il s'agit d'un transfert d'un autre quartier de l'hôpital.

Hôpital d'enseignement complet — Désigne un hôpital qui offre des programmes d'enseignement médical, dûment approuvés par les autorités compétentes, pour la formation clinique des étudiants effectuant leurs deux dernières années d'études dans les disciplines majeures (non pas seulement facultatives), dont la médecine interne et la chirurgie générale.

Hôpital d'enseignement partiel — Désigne un hôpital qui offre des programmes réguliers d'enseignement médical, dûment approuvés par les autorités compétentes, aux diplômés en médecine dans au moins un programme de résidence d'une spécialité médicale.

Allied Special Hospitals

Includes children's, convalescent and/or rehabilitation, chronic and/or extended care and "other" hospitals.

Children's — A hospital which provides primarily for the diagnosis and short-term treatment of paediatric patients, generally 14 years of age and under.

Convalescent and/or rehabilitation — A hospital whose program is directed primarily to the recovery and rehabilitative phase of treatment for patients disabled by illness or injury.

Chronic and/or extended care — A hospital which provides primarily for the prolonged treatment of patients with chronic and long-term conditions.

Other — A hospital which provides primarily for the treatment of a limited range of diseases or injuries, or which restricts admissions to a particular age group or sex. Examples of such specified categories may include orthopaedic, maternity, neurological, cancer hospitals. A hospital which provides a combination of various types of service and cannot be classified in any one of the foregoing categories is included in this group. "Other" also includes Nursing Stations and Outpost Hospitals.

Type of Unit

Short-term

Those units provided for patients who at the time of admission require extensive diagnostic and treatment services and/or skilled nursing care and comprehensive medical attention.

Long-term

Convalescent and/or rehabilitation — Refers to units providing for the care and treatment of patients:

- (a) who have passed the acute or emergency stage and whose condition can be improved by skilled nursing care and medical attention in a hospital and/or
- (b) who have disabling conditions which may be improved by rehabilitation treatment in hospital.

Chronic and/or extended care — Refers to units providing for the care and treatment of patients suffering from chronic or long-term illnesses or conditions which require continued nursing care and medical attention in a hospital.

Other — Refers to long-term units which do not clearly fall under the foregoing categories.

Hôpitaux spéciaux divers

Comprend pédiatrique, convalescence et (ou) réadaptation, chronique et (ou) soins prolongés et "autres" hôpitaux.

Pédiatrique — Hôpital qui se spécialise dans le diagnostic et le traitement à court terme des maladies chez les enfants, âgés généralement de 14 ans ou moins.

Convalescence et (ou) réadaptation — Hôpital qui s'occupe surtout du rétablissement et de la réadaptation des personnes rendues invalides par suite d'une maladie ou d'un traumatisme.

Maladies chroniques et (ou) soins prolongés — Hôpital qui se spécialise dans le traitement des malades souffrant de maladies chroniques ou dont l'état requiert des soins prolongés.

Autres — Hôpital qui se spécialise dans le traitement d'un nombre restreint de maladies ou de traumatismes, ou qui n'admet que les malades d'un groupe d'âge ou d'un sexe particulier (par ex., orthopédie, maternité, neurologie, cancer). L'hôpital qui offre divers genres de services et qui ne peut être classé dans aucune des catégories susmentionnées est compris dans ce groupe. "Autres" comprend en outre les postes de soins infirmiers et les hôpitaux éloignés.

Genre d'unité

Maladies aiguës

Il s'agit des unités où sont traités les malades dont l'état, au moment de leur admission, requiert des services intensifs de diagnostic et de traitements et (ou) des soins infirmiers spécialisés et une attention médicale soutenue.

Maladies de longue durée

Convalescence et (ou) réadaptation — Désigne les unités servant aux soins et au traitement des malades:

- a) qui ont franchi le stade critique ou grave et dont l'état peut être amélioré par des soins infirmiers et médicaux spécialisés dans un hôpital, et (ou)
- b) dont l'état d'impotence peut être amélioré par des traitements de réadaptations à l'hôpital.

Maladies chroniques et (ou) soins prolongés — Désigne les unités soignant les malades souffrant de maladies chroniques ou de longue durée, ou dont l'état requiert des soins infirmiers et médicaux continus dans un hôpital.

Autres — Lorsque les unités n'entrent pas dans les catégories ci-dessus.

Other/Autres

Public, other — Publics, autres

Table Interpretation

Various statistical values are presented to enable a comprehensive analysis and explain existing differences in rates among employment categories according to academic qualifications of personnel.

Quartile values were deleted in cases where less than four nurses were involved.

Much of the intent, method and terminology associated with the survey can be obtained by reference to the Instructions and Definitions and the Questionnaire reproduced in the appendix of this report.

Interprétation des tableaux

Diverses valeurs statistiques sont données pour permettre d'effectuer une analyse complète et d'expliquer les différences de taux entre les catégories d'emplois suivant le niveau de formation professionnelle.

Dans les cas où il y avait moins de quatre infirmières les quartiles n'ont pas été établis.

On peut trouver bon nombre de renseignements sur l'objectif, la méthode et la terminologie de l'enquête dans les Directives et définitions et dans le questionnaire reproduit en appendice au présent rapport.

First Quartile

The salary below which 25% of the nurses earn less and 75% earn more.

Premier quartile

Traitement plafond du premier quart des infirmières, dans l'ordre croissant des traitements.

Median (or Second Quartile)

The salary at which point 50% earn less and 50% earn more.

Third Ouartile

The salary below which 75% of the nurses earn less and 25% earn more.

The Mean

The "average" salary obtained by dividing total salaries for any given group by the number of nurses comprising the group. The mean therefore can be influenced by the frequency of unusually high or low observations.

Mean Minimum - Mean Maximum

The average of the minimums and maximums reported as representing the range in annual salaries for any particular group.

Unpublished Data

Generally, all data as collected on the Questionnaire are available to those wishing more detailed information on particular groupings. However, it should be noted that information which would reveal the situation of individuals must be suppressed.

Médiane (deuxième quartile)

Traitement plafond de la première moitié des infirmières, dans l'ordre croissant des traitements.

Troisième quartile

Traitement plafond des trois premiers quarts des infirmières, dans l'ordre croissant des traitements.

Moyenne

Le traitement "moyen" obtenu en divisant la somme des traitements d'un groupe donné par le nombre d'infirmières constituant ce groupe. La moyenne peut ainsi être influencée par la présence d'observations exceptionnellement élevées ou exceptionnellement faibles.

Moyenne minimum - Moyenne maximum

La moyenne des minimums et des maximums des barèmes déclarés des traitements annuels d'un groupe donné.

Données non publiées

En général, tous les renseignements du questionnaire peuvent être fournis à ceux qui désirent des statistiques plus detaillées sur certains groupes. Toutefois, il y a lieu de noter que les renseignements qui révéleraient la situation des individus ne peuvent être dévoilés.

INTRODUCTION

This report is one of the planned series of biennial reports on annual salaries of hospital nursing personnel, employed full-time in public hospitals in Canada. The data contained herein were obtained by means of a voluntary survey and represent the situation as reported by the hospitals for a particular point in time (May 15, 1976). However, hospitals whose contracts with nursing personnel were still under negotiations at the time of this survey, were allowed to report salary rates being paid at that time.

Le présent bulletin s'inscrit dans la série des publications biennales sur la rémunération annuelle du personnel infirmier à temps plein des hôpitaux publics du Canada. Les données qui y sont présentées ont été obtenues grâce à une enquête à caractère non obligatoire et traduisent la situation telle qu'elle a été déclarée par les hôpitaux à une date précise (le 15 mai 1976). Toutefois, les hôpitaux où les conventions collectives concernant le personnel infirmier étaient en cours de négociations au moment de l'enquête, ont été autorisés à déclarer les échelles de traitement en vigueur à cette époque.

INSTRUCTIONS AND DEFINITIONS

FOR THE COMPLETION OF THE

NURSING STAFF SALARY QUESTIONNAIRE, 1976

General

Statistics Canada has been requested by a number of public bodies, government departments and hospital authorities to conduct and expand the nursing salary survey started in 1968. Accordingly, we have entered into agreement with various parties to approach hospitals all across Canada for salary and employment data for all full-time personnel employed in the nursing categories outlined.

For information to be reliable and of value, each and every hospital is urged to complete this questionnaire and return it to Statistics Canada at Ottawa before, 1976.

Staff to be included

All graduate nurses and qualified nursing assistants employed by the hospital on a full time basis as at May 15, 1976 and functioning within the nursing services or in nursing education are to be included in this survey. If a member of this staff is employed in a dual position record data for her against the category of employment in which she spends the major portion of her time.

Annual salary rates and ranges

Please round to the nearest dollar and quote the annual salary rates and ranges in effect as at May 15, 1976. However, if you have negotiated new salary scales, not yet implemented, but which are retroactive to a date earlier than May 15, 1976, please quote the new rates.

Use of forms

Please note that one page is to be completed and returned for each of the following EMPLOYMENT CATEGORIES in which you had staff employed as at May 15, 1976.

Employment categories:

Graduate Nurses Employed Full-time As:

Senior nursing advisor - Under general direction, provides nursing advisory and consultative service to Senior Management; recommends policies for improvement and promotion of nursing and hospital services; represents the Employer on national and provincial health and hospital committees; analyzes and disseminates information concerning nursing activities; participates in the planning and development of special projects and new activities; provides leadership and support to Hospital Nursing Committees; establishes and maintains liaison with Companies, Government Departments and Health Agencies; may represent the Employer in bargaining on Collective Agreement for Nurses.

Director, nursing services - large hospital - In a large hospital, directs, administers and evaluates the total nursing program in accordance with the philosophy, objectives and policies of the hospital; plans for total patient care with the administration, the medical staff, other departments of the hospital and community agencies; plans for and implements a program of in-service education for professional and auxiliary nursing service personnel; prepares and administers the nursing service budget; assesses the qualifications of candidates for employment and establishes performance requirements.

Director or assistant director, nursing services - In a medium hospital directs, administers and evaluates the total nursing program in accordance with the philosophy, objectives and policies of the hospital; plans for total patient care with the administration, the medical staff, other departments of the hospital and community agencies; plans for and implements a program of in-service education for professional and auxiliary nursing service personnel; prepares and administers the nursing service budget; assesses the qualifications of candidates for employment and establishes performance requirements.

OR

In a large hospital assists in directing, administering and evaluating the total nursing program in accordance with the philosophy, objectives and policies of the hospital; assists in planning for total patient care with the administration, the medical staff, other departments of the hospital and community agencies; assists in planning for and in implementing a program of in-service education for professional and auxiliary nursing service personnel; assists in preparing and administering the nursing service budget, in assessing the qualifications of candidates for employment and in establishing performance requirements.

Nurse, supervisor or director or assistant director nursing services - Under direction, supervises and evaluates the nursing service of a group of patient care units such as orthopaedics, obstetrics, surgery, internal medicine, psychiatrics, etc; interprets operating procedures and policies; gives guidance to head nurses to ensure effective utilization of nursing personnel; appraises performance of nursing staff and participates in orientation and in-service educational programs; co-ordinates nursing with all other patient care and treatment services.

OR

In a small hospital directs, administers and evaluates the total nursing program in accordance with the philosophy, objectives and policies of the hospital; plans for total patient care with the administration, the medical staff, other departments of the hospital and community agencies; plans for and implements a program of in-service education for professional and auxiliary nursing service personnel; prepares and administers the nursing service budget; assesses the qualifications of candidates for employment and establishes performance requirements.

OR

In a medium hospital, assists in directing, administrating and evaluating the total nursing program in accordance with the philosophy, objectives and policies of the hospital; assists in planning for total patient care with the administration, the medical staff, other departments of the hospital and community agencies; assists in planning for and in implementing a program of in-service education for professional and auxiliary nursing service personnel; assists in preparing and administering the nursing service budget, in assessing the qualifications of candidates for employment and in establishing performance requirements.

<u>Head nurse</u> - Under general supervision of the nursing Supervisor, administers the nursing services in a single ward or unit of a hospital in order to provide and maintain a high standard of patient care; plans for total care in the unit with nursing staff, physicians and other hospital personnel; fosters effective and harmonious relationships with members of community agencies, patients and their families.

<u>Assistant head nurse</u> - Assists the head nurse with the administration and supervision of the nursing service in a single ward or unit of a hospital; substitutes for the head nurse in her absence; performs nursing duties.

General duty nurse - Under general supervision in a hospital ward or unit, observes patients to evaluate their symptoms reactions and progress to identify their nursing needs and to develop a nursing care plan; gives skilled nursing care; may act as a team leader and assign, supervise and evaluate nursing activities of members of the nursing team; maintains accurate and informative records of observations, health conditions and care provided.

Registered nurse with no experience - Under the guidance of an experienced nurse, performs a variety of tasks designed to develop expertise in the application of nursing knowledge and to provide a knowledge of the philosophies, policies, routines and procedures of the employing department or institutions.

Note: Employees at this level are normally promoted to the next level after a period varying from three to six months.

<u>Director or assistant director, nursing education</u> - Under general direction of the hospital board, or immediate direction of the Director, Nursing Services, administers, directs and participates in the training of student nurses; recommends standards for admission, objectives and content of courses with the aid of faculty members; co-ordinates clinical and academic aspects of training; supervises staff of instructors, and may teach or lecture to classes.

Nursing instructor - Instructs student nurses in the theory and practical aspects of the nursing art and science where clinical experience is an integral part of the academic work; lectures to classes and demonstrates nursing techniques; may also instruct nursing auxiliaires and orderlies, psychiatric aides and attendants.

Qualified nursing assistants employed full-time:

<u>Currently registered</u>, <u>licensed or certified</u> - Persons below the level of graduate nurse who have successfully completed a formal course of nursing training and who are registered, licensed or certified by the legally-appointed authority of the province in which the hospital is located. Depending on provincial legislation these nursing personnel may be known as:

Registered Nursing Assistants, Licensed Nursing Assistants, Certified Nursing Assistants, Certified Nursing Aides, Licensed Practical Nurses.

Not currently registered, licensed or certified — Persons below the level of graduate nurse who have successfully completed a formal course of nursing training and who were registered, licensed or certified in the province in which they took the training, but who are now working in another province.

Educational qualifications

Include every graduate nurse only once under the category which describes her highest level of achievement in nursing education.

<u>Graduate nurse only</u> - Graduation from recognized nursing schools providing training up to the level which is a prerequisite to registration as an "R.N." by the Registered Nurses Association of the province.

Clinical post-graduate training - A graduate nurse whose nursing education includes a post-graduate course, of at least three months duration, in a clinical specialty such as obstetrics, pediatrics, surgical techniques, etc.

University diploma (one year) - A graduate nurse who has obtained a university diploma for one year of study in a recognized course focussed upon the nursing sciences.

Bachelor's degree in nursing - A graduate nurse who has obtained a bachelor's degree in the nursing sciences from a university of recognized standing.

Master's degree in nursing - A graduate nurse who has obtained a master's degree in the nursing sciences from a university of recognized standing.

Standard work week in hours

Enter against the appropriate category the usual work week for nursing personnel in that category in your hospital. Round all hours to one decimal place, e.g. 40 = 40.0, 36.25 = 36.3 etc.

Annual salary range as at May 15, 1976

Enter against the appropriate line and column the minimum and maximum annual salary rate (excluding shift defferentials) for the salary range for each category in which nursing staff are employed in your hospital as at May 15, 1976. Round all figures to the nearest dollar.

If you have negotiated a new scale of salaries, which are not yet implemented, but which are retroactive to a date earlier than May 15, 1976, please quote the new rates.

If you have no incremental salary range in effect but only a single rate effective for a particular category of nursing staff, leave the salary range blank.

Actual annual salary rates paid as of May 15, 1976

If the salary levels for your hospital extend beyond the 16 levels provided for on the reporting form, please report the data for the additional levels on the corresponding line (any col.) on the reverse side of the form.

Please convert all salaries or wages to an annual rate. If certain staff, such as Qualified Nursing Assistants, are paid at an hourly rate convert this to an annual rate by multiplying the hourly rate by the number of paid hours in the year. Calculate the number of paid hours in the year by multiplying the normal work week by 52. Round all annual salary rates to the nearest dollar.

Following is an example of a hospital which has 163 graduate nurses employed full time as at May 15, 1976 where the standard work week for all categories was 40 hours. Follow the example carefully to observe how the schedule should be completed. One page of the questionnaire is required for each of the five employment categories represented in the sample hospital. The method for completion of the forms is shown in the accompanying sample, using category No. 06 (General Duty-Registered) as an illustration.

DIRECTIVES ET DÉFINITIONS

QUESTIONNAIRE SUR LA RENUMERATION DES INFIRMIÈRES - 1976

Généralités

Un certain nombre d'organismes publics, de ministères de l'État et d'administrateurs d'hôpitaux ont demandé à Statistique Canada de reprendre et d'étendre l'enquête sur les traitements du personnel infirmier commencée en 1968. Par conséquent, nous avons convenu avec diverses parties de nous mettre en rapport avec les hôpitaux de tout le Canada afin de recueillir des données sur la rémunération et l'emploi du personnel à plein temps des catégories de soins infirmiers définies plus loin.

Personnel à inclure

Doivent être comprises dans la présente enquête toutes les <u>infirmières</u> diplômées et les <u>infirmières</u> auxiliaires qualifiées employées à <u>plein temps</u> par l'hôpital au 15 mai 1976 affectées aux services de soins infirmiers ou d'enseignement infirmier. Lorsqu'un membre de ce personnel occupe deux postes, consigner les données le concernant dans la catégorie d'emploi où il passe la plus grande partie de son temps.

Taux et échelle de traitement annuel

Arrondir les chiffres au dollar près et indiquer les taux et l'échelle de traitement annuel en vigueur au 15 mai, 1976. Cependant, si vous avez négocié de nouvelles échelles de traitement qui n'ont pas encore été mises en vigueur mais sont rétroactives à une date antérieure au 15 mai 1976, veuillez indiquer les nouveaux taux.

Utilisation des formules

Remarquer qu'il faut remplir et renvoyer une page pour chacune des catégories suivantes d'emploi dont faisaient partie des membres de votre personnel au 15 mai 1976.

Catégories d'emploi:

Infirmières diplômées employées à plein temps:

Infirmière conseille séniore - Sous directives générales, donne des conseils et des consultations à la haute direction; recommande des politiques visant à améliorer et promouvoir les services infirmiers et les services des hôpitaux; représente l'employeur sur des comités nationaux et provinciaux traitant de la santé et des hôpitaux; analyse et fait circuler les informations se rapportant aux activités infirmières; dirige et encourage les comités infirmiers des hôpitaux; établie et maintient des liaisons avec des compagnies, des ministères et des agences de santé; peut représenter l'employeur aux négociations de conventions collectives pour les infirmières.

Directrice, services infirmiers - hôpital d'importance majeure - Dans un hôpital d'importance majeure, dirige, administre et évalue l'ensemble du programme des services infirmiers, dans le cadre de la philosophie, des objectifs et des lignes de conduite de l'hôpital; planifie l'ensemble des soins aux malades avec les administrateurs, le personnel médical, les autres départements de l'hôpital et les agences de la communauté; planifier et mettre en vigueur un programme de formation en cours d'emploi pour le personnel spécialisé et auxiliaire du service infirmier; préparer et administrer le budget du service infirmier; évaluer les qualités des candidates aux postes d'infirmières et établir les normes de rendement.

Directrice ou directrice adjointe, services infirmiers - Dans un hôpital d'importance moyenne, dirige, administre et évalue l'ensemble du programme des services infirmiers, dans le cadre de la philosophie, des objectifs et des lignes de conduite de l'hôpital; planifie l'ensemble des soins aux malades avec les administrateurs, le personnel médical, les autres départements de l'hôpital et les agences de la communauté; planifier et mettre en vigueur un programme de formation en cours d'emploi pour le personnel spécialisé et auxiliaire de service infirmier; préparer et administrer le budget du service infirmier; évaluer les qualités des candidates aux postes d'infirmières et établir les normes de rendement.

OU

Dans un hôpital d'importance majeure, aide à diriger, administrer et évaluer l'ensemble du programme des services infirmiers, dans le cadre de la philosophie, des objectifs et des lignes de conduite de l'hôpital; aide à planifier l'ensemble des soins aux malades avec les administrateurs, le personnel médical, les autres départements de l'hôpital et les agences de la communauté; aide à planifier et mettre en vigueur un programme de formation en cours d'emploi pour le personnel spécialisé et auxiliaire du service infirmier; aide à préparer et administrer le budget du service infirmier; évaluer les qualités des candidates aux postes d'infirmières et établir les normes de rendement.

Infirmière, surveillante ou directrice ou directrice adjointe des services infirmiers— Sous directives, surveiller et évaluer le service infirmier d'un groupe d'unités destinés aux soins des malades comme en orthopédie, en obstétrique, en chirurgie, en médecine interne, en psychiatrie, etc.; interpréter les méthodes et lignes de conduite du travail; orienter les infirmières en chef pour assurer la bonne utilisation du personnel infirmier; apprécier le rendement du personnel infirmier, diriger les programmes d'études en cours d'emploi et y participer; coordonner le service infirmier avec tous les autres services de soins et de traitement des malades.

OU

Dans un hôpital d'importance mineure, dirige, administre et évalue l'ensemble du programme des services infirmiers, dans le cadre de la philosophie, des objectifs et des lignes de conduite de l'hôpital; planifie l'ensemble des soins aux malades avec les administrateurs, le personnel médical, les autres départements de l'hôpital et les agences de la communauté; planifier et mettre en vigueur un programme de formation en cours d'emploi pour le personnel spécialisé et auxiliaire du service infirmier; préparet et administrer le budget du service infirmier; évaluer les qualités des candidates aux postes d'infirmières et établir les normes de rendement.

OU

Dans un hôpital d'importance moyenne, aide à diriger, administrer et évaluer l'ensemble du programme des services infirmiers, dans le cadre de la philosophie, des objectifs et des lignes de conduite de l'hôpital; aide à planifier l'ensemble des soins aux malades avec les administrateurs, le personnel médical, les autres départements de l'hôpital et les agences de la communauté; aide à planifier et mettre en vigueur un programme de formation en cours d'emploi pour le personnel spécialisé et auxiliaire du service infirmier; aide à préparer et administrer le budget du service infirmier; évaluer les qualités des candidates aux postes d'infirmières et établir les normes de rendement.

Infirmière, chef - Sous la surveillance générale de la surveillante du service infirmier, administrer le service infirmier dans une seule salle ou une unité d'hôpital pour assurer des soins de haute qualité aux malades; planifier avec le personnel infirmier, les médecins et autre personnel hospitalier l'ensemble des soins dispensés dans l'unité; entretenir des rapports harmonieux avec les membres des agences locales, les malades et leur famille.

Infirmière, chef adjointe - Aider l'infirmière en chef à administrer et surveiller le service infirmier dans une seule salle ou unité d'hôpital; remplacer l'infirmière en chef en son absence; accomplir diverses fonctions infirmières.

Infirmière, service général - Sous surveillance générale, dans une salle ou unité d'hôpital, observe les patients pour évaluer leurs symptômes, réactions et leur progrès afin d'identifier leurs besoins et de développer un plan d'action; dispense des soins infirmiers spécialisés; peut agir comme chef d'équipe et assigner des tâches, surveiller et évaluer les activités infirmières des membres de l'équipe; prend des notes concises de ses observations médicales, des conditions de santé des patients et des soins dispensés dans des dossiers.

Infirmière autorisée licenciée sans expérience - Sous la conduite d'une infirmière expérimentée, exécute une variété de tâches qui ont pour objet de développer l'expertise dans l'application des connaissances et la connaissance de la philosophie, des politiques, de la routine et des procédures du ministère ou de l'organisme employeur.

Nota Bene: Généralement les employés à ce niveau sont promus au niveau supérieur après une période variant de trois à six mois.

Directrice ou directrice adjointe, école des infirmières - Sous directives générales du conseil de l'hôpital ou sous directives immédiates de la directrice des services infirmiers, administrer, diriger la formation des infirmières étudiantes et y participer; recommander des normes de recrutement, des objectifs et des matières de cours avec l'aide des membres de la faculté; coordonner la formation clinique et scolaire; surveiller le personnel des enseignantes et, à l'occasion, enseigner ou donner des cours.

<u>Infirmière enseignante</u> - Enseigner aux infirmières étudiantes la théorie et les aspects pratiques de l'art et de la science du service infirmier où les leçons sont partie intégrante du travail scolaire; donner des cours et expliquer les techniques infirmières; enseigner aussi, à l'occasion, aux aides-infirmières et aux infirmières, aux aides et aux adjoints psychiatriques.

Infirmières auxiliaires qualifiées employées à plein temps

Autorisées, licenciées ou agréées - Personnes au-dessous du niveau d'infirmière diplômée qui ont achevé avec succès un cours régulier de formation professionnelle et qui sont autorisées, licenciées ou agréées par l'autorité juridique de la province où est situé l'hôpital. Selon les lois de chaque province, ces infirmières sont appelées.

Infirmières-auxiliaires autorisées, Infirmières-auxiliaires licenciées, Infirmières-auxiliaires agréées, Aides-infirmières agréées, Infirmières licenciées non agréées,

Non autorisées, non licenciées et non agréées-Personnes au-dessous du niveau d'infirmière diplômée qui ont achevé avec succès un cours régulier de formation professionnelle et qui ont été autorisées, licenciées ou agréées dans la province où elles ont suivi ce cours, mais qui travaillent présentement dans une autre province.

Titres professionnnels

Chaque infirmière diplômée ne doit figurer que dans la catégorie qui décrit le niveau le plus élevé atteint par elle dans l'enseignement infirmier.

<u>Infirmière diplômée seulement</u> - Grade délivré par les écoles reconnues de sciences infirmières dispensant des cours de formation professionnelle jusqu'au niveau requis pour l'immatriculation comme "infirmière autorisée" par l'association des infirmières autorisées de la province.

Formation clinique post-scolaire - Désigne une infirmière diplômée dont la formation en soins infirmiers comprend un cours post-scolaire, de spécialisation clinique de trois mois au moins, comme l'obstétrique, la pédiatrie, les techniques chirurgicales, etc.

<u>Diplôme universitaire (un an)</u> - Désigne une infirmière diplômée qui a obtenu un diplôme universitaire après avoir suivi pendant une année un cours reconnu de sciences infirmières.

Baccalauréat en soins infirmiers - Désigne une infirmière diplômée qui détient un baccalauréat des sciences infirmières d'une université reconnue.

Maîtrise en soins infirmiers - Désigne une infirmière diplômée qui détient une maîtrise des sciences infirmières d'une université reconnue.

Semaine normale de travail en heures.

Inscrire en regard de la catégorie appropriée le nombre d'heures de la semaine habituelle de travail du personnel infirmier de votre hôpital dans cette catégorie, Arrondir toutes les heures à un point décimal, par exemple, 40 = 40.0, 36.25 = 36.3, etc.

Echelle du traitement annuel au 15 mai 1976

Inscrire sur la ligne et dans 'la colonne appropriée le taux du traitement annuel minimum et maximum (en excluant les primes pour travail de nuit) de l'échelle de traitement pour chaque catégorie dont fait partie le personnel infirmier employé par votre hôpital au 15 mai 1976. Arrondir tous les chiffres au dollar près.

Si vous avez négocié une nouvelle échelle de traitement qui n'a pas encore été mise en vigueur, mais qui est rétroactive à une data antérieure au 15 mai 1976, veuillez indiquer les nouveaux taux.

S'il n'existe pas d'échelle de traitement progressif, mais seulement un taux unique pour une catégorie particulière du personnel infirmier, ne pas inscrire l'échelle de traitement annuel.

Taux annuel réel du traitement au 15 mai 1976.

Si l'échelle des traitements dans votre hôpital compte plus de seize niveaux, nombre prévu dans la formule de déclaration, veuillez déclarer les niveaux supplémentaires au verso de la formule, sur la même ligne (peu importe la colonne).

Prière de convertir tous les traitements ou salaires en un taux annuel. Si certaines employées comme, par exemple, les infirmières auxiliaires qualifiées, sont payées à un taux horaire, convertir ce taux en un taux annuel en multipliant le taux horaire par le nombre d'heures de travail rémunéré de l'année. Calculer le nombre d'heures de travail rémunéré dans l'année en multipliant les heures de la semaine normale de travail par 52. Arrondir tous les taux de traitement annuel au dollar près.

Voici un example d'un hôpital qui a 163 infirmières diplômées employées à plein temps au 15 mai 1976 dont la semaine normale de travail pour toutes les catégories était de 40 heures. On devra remplir la formule en suivant cet exemple de près. Il faut une page du questionnaire pour chacune des cinq catégories d'emploi de l'hôpital.

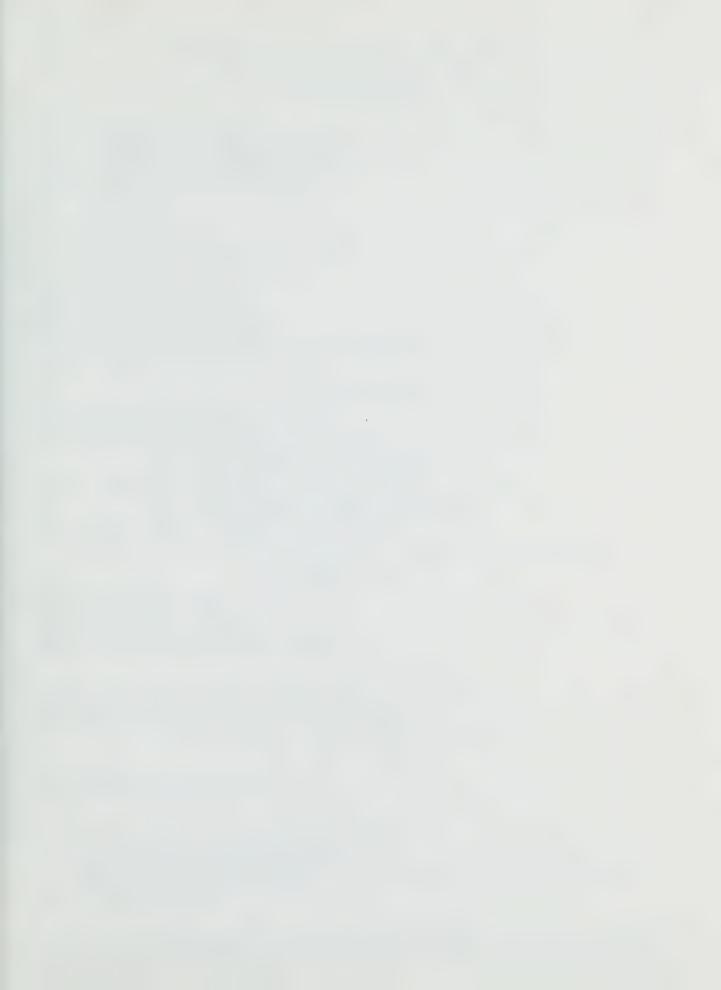

Le spécimen ci-joint montre la façon de remplir les formules. On a pris comme exemple la catégorie n^o 06 (Service général - autorisées).
